Scope of Work**

GIS Analyst/Statistician

JOB PURPOSE AND SUMMARY

The GIS Analyst is responsible for performing the assigned technical tasks to satisfy the need for GIS projects or services that support the activities of various city divisions and departments.

ESSENTIAL FUNCTIONS

- ESRI ArcGIS version 10 and above map development to support of web-based GIS applications' base map and geoprocessing services
- Provide geodatabase and data maintenance for divisions as needed
- Data capturing and conversion of GIS data for all GIS activities in compliance with industry standard topology guidelines
- Ensure that metadata is compliant with FGDC standards for all map data
- Perform complex GIS analyses with a variety of data formats, Shape Files, Personal Geodatabases, Third Party data sources (Oracle, SQL Server, Excel, Access, etc.), images
- Conduct high-level statistical modeling utilizing ArcGIS Statistical Analysis tools and extensions including Model Builder
- Work as part of the GIS team to develop distributed products via web-based technology and desktop software
- Expert utilization of the entire suite of ESRI GIS software including all extensions (Network Analyst, Spatial Analyst, etc) to perform high-level analysis to support various mapping projects and web-based applications
- Expert in performing all Python Scripting services needed for support of web-based applications
- Expert utilization of ArcGIS Server management tools to deploy and manage map and web services

QUALIFICATIONS

- Bachelor's Degree in GIS, Geography, Engineering, Computer Science, Planning or other related field.
- 2-3 years professional working experience in GIS techniques and methodologies
- Expertise in ESRI software including current version of ArcGIS/ArcInfo and all ArcGIS extensions
- Working Experience with ArcGIS Server management tools
- Working Experience in writing and utilizing Python Scripting language
- Windows Operating Systems environment experience
- Knowledge of industry standard data models for municipal government agencies

PREFERRED ADDITIONAL QUALIFICATIONS

- Masters Degree in Geography, Computer Science or a related field preferred
- Working experience in GIS application development
