

City of Memphis
Rock Creek Parkway – Fiber Optic Cable Build
RFQ # SAIC CoM 2014 – RG R117021
Answers to Questions

	<u>RFQ Section</u>	Question	Response
1.		What is the approximate size of the project?	Length/Distance of the fiber build – approximately 1.7 miles of fiber from the fire station to the backbone
2.		Is this strictly a price quote or will there be an award of contract issued for the work?	A contract will be awarded for the work.
3.		In the Details of the build, Line 2 mentions an attached diagram. What page is this diagram on?	Diagram is on Page 16 of the RFQ
4.		Where at US-64 and Germantown Rd is the existing fiber optic located?	The splice point is shown on the diagram – US-64 and Germantown Parkway
5.		At what location in the fire station will the fiber optic cable terminate? Is it possible to arrange a site visit at the fire station	The fiber will terminate in the existing MDF in a cabinet provided by the City. The site visit should be coordinated with Mickey Alderson and he will engage the CoM ITO to arrange the site visit.
