Santa vs. the Snowman

Now through December 31, 2008

This heart-warming, animated holiday film is a family favorite. Meet Santa, the Snowman and all the elves and reindeer at the North Pole in this story of holiday spirit and friendship. Sponsored by Bluff City Jaguar-Land Rover.

Sea Monsters: A Prehistoric Adventure

Now through March 6, 2009

Take a remarkable journey into the relatively unexplored world of the “other dinosaurs,” those reptiles that lived beneath the water. Developed with National Geographic’s trademark authenticity and powerful storytelling, the film reconstructs the extraordinary world of history’s grandest ocean creatures in the late Cretaceous seas—the most dangerous oceans in history. Funded in part through a grant from the National Science Foundation and locally sponsored by ACH Food Companies, Inc. Suitable for children 5 years of age and older.

Mummies: Secrets of the Pharaohs

Now through November 13, 2009

Follow explorers as they piece together the archeological and genetic clues of Egyptian mummies. These relics of the past create a window into the fascinating and mysterious world of the pharaohs. To unwrap the secrets of the pharaohs is to glimpse perhaps the future of our own civilization.

Sundays, December Only!

1:30pm

Star of Wonder – This reverent program explores the mystery “star” sighted by the Magi and recorded in the gospel according to Mathew. Using scientific principals to investigate this mystery leads us to some possible candidates for the Nativity Star and possibly a more accurate date for the birth of Jesus. Science can only take us so far and leaves each of us to decide for ourselves the true nature of The Star of the Magi.

3:00pm:

Sundays, 12/7 & 12/14:

Autumn Nights

A familiarization tour of the changing night sky for fall.

Sundays, 12/21 & 12/28

The Scoop on Poop: The Science of What Animals Leave Behind

January 24 – May 3, 2009

Fish do it, frogs do it, pythons, eagles and elephants do it, yet poop is one of those subjects we find difficult to talk about with a straight face. Kids, however, will love this exhibit and learn a lot when they examine what an animal leaves behind.
