

Blade Server Vendor RFQ  
Question and Answer  
Tuesday, November 17, 2009

**Question**

What type of current infrastructure do you have that the 10gb needs to connect to?

Or do you even need to connect to it at all? As of right now it looks like it just needs to be 10gb capable.

**Answer**

There is currently no 10 GB infrastructure in place. The devices need to be capable of 10 GB for future infrastructure upgrades.
