</table>
**1. Damp and Mold growth**  
Caused by dust mites, mold or fungal growth caused by dampness and/or high humidity. It includes threats to mental health and social well-being caused by living with damp, damp staining and/or mold growth.  
*Most vulnerable: 14 years or less*

**2. Excess cold**  
Caused by excessively cold indoor temperatures.  
*Most vulnerable: 65 years or older*

**3. Excess heat**  
Caused by excessively high indoor air temperatures.  
*Most vulnerable: 65 years or older*

**4. Asbestos, Silica and other MMF**  
Caused by excessive levels of silica, asbestos and man-made mineral fibers (MMF).

**5. Biocides**  
Threats to health from those chemicals used to treat timber and mold growth in dwelling. While biocides include insecticides and rodenticides to control pest infestations (e.g. cockroaches or rats and mice), these are not considered for the purposes of the HHRT.  
*Most vulnerable: No Specific Group*

**6. Carbon monoxide and fuel combustion products**  
Excess levels of carbon monoxide, nitrogen dioxide, sulphur dioxide and smoke in the dwelling’s atmosphere.  
*Most vulnerable: 65 years or older*

**7. Lead**  
Ingestion from lead-paint dust, debris or leaded water pipes.  
*Most vulnerable: 6 years or younger*

**8. Radiation**  
This category covers the threats to health from radon gas and its daughters, primarily airborne, but also radon dissolved in water.  
*Most vulnerable: All persons aged 60 - 64 with lifelong exposure*

**9. Uncombusted fuel gas**  
Fuel gas escaping into the atmosphere within a dwelling.  
*Most vulnerable: No Specific Group*

**10. Volatile Organic Compounds**  
Volatile organic compounds (VOCs) are a diverse group of organic chemicals which includes formaldehyde, that are gaseous at room temperature, and are found in a wide variety of materials in the home.  
*Most vulnerable: No Specific Group*

**11. Crowding and Space**  
This category covers hazards associated with lack of space within the dwelling for living, sleeping and normal family/household life.  
*Most vulnerable: No Specific Group*

**12. Entry by Intruders**  
Difficulties in keeping a dwelling secure against unauthorized entry and the maintenance of defensible space.  
*Most vulnerable: No Specific Group*

**13. Lighting**  
This category covers the threats to physical and mental health associated with inadequate natural and/or artificial light. It includes the psychological effect associated with the view from the dwelling.  
*Most vulnerable: No Specific Group*

**14. Noise**  
Covers threats to physical and mental health resulting from exposure to noise inside the dwelling or within its curtilage.  
*Most vulnerable: No Specific Group*

**15. Domestic Hygiene, Pests and Refuse**  
Covers hazards which can result from poor design, layout and construction such that the dwelling cannot be readily kept clean and hygienic; access into, and harborage within, the dwelling for pests; and inadequate and unhygienic provision for storing and disposal of household waste.  
*Most vulnerable: No Specific Group*
Food Safety
Threats of infection resulting from inadequacies in provision and facilities for the storage, preparation and cooking of food.
Most vulnerable: No Specific Group

Personal Hygiene, Sanitation and Drainage
Threats of infection and threats to mental health associated with personal hygiene, including personal washing and clothes washing facilities, sanitation and drainage. It does not include problems with pests associated with defective drainage facilities.
Most vulnerable: Children under 5 years

Water Supply
Covers the quality and adequacy of the supply of water within the dwelling for drinking and for domestic purposes such as cooking, washing, cleaning and sanitation. As well as the adequacy, it includes threats to health from contamination by bacteria, protozoa, parasites, viruses, and chemical pollutants.
Most vulnerable: No Specific Group

Falls associated with Baths etc
This category includes any fall associated with a bath, shower or similar facility.
Most vulnerable: 60 years or older

Falling on Level Surfaces etc
This category covers falling on any level surface such as floors, yards, and paths. It also includes falls associated with trip steps, thresholds, or ramps, where the change in level is less than 12 inches or 300mm.
Most vulnerable: 60 years or older

Falling on Stairs etc
This category covers any fall associated with a stairs, steps and ramps where the change in level is greater than 12 inches or 300mm.
Most vulnerable: 5 years or younger

Fire
This category covers threats from exposure to uncontrolled fire and associated smoke at a dwelling.
Most vulnerable: 60 years or older

Explosions
This category covers the threat from the blast of an explosion, from debris generated by the blast, and from the partial or total collapse of a building as the result of an explosion.
Most vulnerable: No Specific Group

Position and Operability of Amenities etc
This category covers threats of physical strain associated with functional space and other features at dwellings.
Most vulnerable: 60 years or older

Structural Collapse and Falling Elements
Covers the threat of whole dwelling collapse, or of an element or a part of the fabric being displaced or falling because of inadequate fixing, disrepair, or as a result of adverse weather conditions. Structural failure may occur internally or externally within the curtilage threatening occupants, or externally outside the curtilage putting at risk members of the public.
Most vulnerable: No Specific Group
