MEMPHIS LIGHT, GAS AND WATER DIVISION

December 05, 2023

To Members of the MLGW Board, Memphis City Council, and Our Valued Customers:

I am honored to present the proposed FY2024 Operating and Capital Budgets for the Memphis Light, Gas and Water Division (MLGW). Since taking the helm of MLGW in December of 2022 and after navigating a challenging 2023, it is clear to me that the focus of effort in the 2024 budget and budgets over the next 5 years must be on reducing the frequency and duration of electric outages, meeting the growing community demand for the electricity we rely upon now and in the future, and maintaining the quality and reliability of water and gas utilities.

The FY24 budget will advance several bold initiatives and proposes a significant increase in spending to drive electric system reliability and resilience by

- Funding aggressive Tree Trimming
- Replacing outdated infrastructure
- Adding more in-house and contracted staff to do the work
- Modernizing the grid to a best-in-class standard
- For the very first time, adding electric battery storage to the system, working to build utility scale solar power

FY24 starts what will result in a multi-year program of \$1.2B of improvements to the Electric Distribution system aimed at reducing frequency and duration of electric outages and making our grid ready for the demands of tomorrow.

This budget also contains significant investments in Gas and Water systems to maintain their quality and reliability and is complemented by what we hope will be significant federal grant awards.

For MLGW, ensuring we have sufficient, reliable power for all our customers, and enabling new, large-use customers to be served without interruption in the near term is critical to continuing economic development in our area. In 2024, MLGW plans to begin deployment of battery storage in the distribution system, which will provide an additional hedge of energy for the system. The battery storage and solar generation projects will be self-sustaining and have no negative impact on customer rates.

Continued inflationary pressure on the cost of goods and services, the addition of more personnel, and critical investments in grid modernization necessitates an acceleration of previously forecast electric rate increases. What was previously a 10.5% increase over three years starting in 2025 is now proposed as a 12.0% increase over three years starting in 2024. The customer impact will be about \$5 per month for electric service, with no increase in rates for gas and water. Even with this change, MLGW's rates will remain among the most affordable and competitive in the nation.

The Total Operating and Capital Budget for 2024 is \$2.3 billion. Almost \$1.2 billion or approximately 63.15% percent of operating expense is budgeted for purchased power and gas costs. MLGW's budgeted operations and maintenance expenses for FY24 total \$564.2 million. MLGW's payment in lieu of taxes to local governments are projected to be \$64.5 million.

MLGW's capital program of \$336.2 million reflects our commitment toward modernizing and maintaining the integrity and reliability of our system infrastructure and our continued commitment to provide high quality, reliable service to our customers in a cost-effective and efficient manner.

Respectfully

Doug McGower
President and CEO

How to Read the Budget

INTRODUCTION

We are pleased to submit the 2024 Budget of Memphis Light, Gas and Water Division (MLGW) as required by Memphis City Ordinance #3509. This Budget has been prepared in compliance with this ordinance, which requires conformity to the Federal Energy Regulatory Commission (FERC), the regulations of any other applicable regulatory body, and in accordance with the provisions of the bond resolutions approved by the Memphis City Council.

Memphis Light, Gas and Water Division's accounting and financial practices conform to Generally Accepted Accounting Principles (GAAP), under the rules and regulations of the Governmental Accounting Standards Board (GASB) and the Financial Accounting Standards Board (FASB).

Memphis Light, Gas and Water Division was created by an amendment to the City Charter, adopted March 9, 1939. MLGW operates three separate utilities, as divisions, providing electricity and gas in the City and Shelby County. Water service is provided by MLGW in the City and, together with other municipal systems, in Shelby County. Each division operates as a separate entity for accounting and financial purposes pursuant to the City Charter. For economic reasons, activities common to all three divisions are administered jointly and costs are prorated among the divisions. The 2024 operating and capital budgets are developed simultaneously and are presented together in a combined budget. In this manner, MLGW can accomplish personnel planning and allocate resources to ensure the achievement of each strategic organization of focus.

THE BUDGET PROCESS

Memphis Light, Gas and Water Division develops the operating and capital expenditure budgets annually to coincide with its fiscal year, which extends from January 1 to December 31. The budget process begins early in the year that precedes the fiscal year for which the budget will take effect. The entire process continues for several months until final approval is obtained by the Memphis City Council.

At the onset of the process, a budget schedule is created to establish the critical deadlines for activities necessary in producing the final approved budget document. Some of the budget calendar events include planning meetings, multiple budget training sessions, capital project budget meetings and equipment budget meetings, all of which are completed before the end of June.

During July through August, requests for the upcoming budget year are submitted by organization supervisors and managers. The vice presidents are then responsible for reviewing the proposed budget and making necessary adjustments.

The proposed budget goes through several stages of formal review and approval before being finalized. The initial level of approval occurs during mid-August through early October by the members of MLGW's executive staff. A preliminary budget document is subsequently

How to Read the Budget

developed and presented to the MLGW Board of Commissioners for review and approval in October with the final budget approved by the Memphis City Council scheduled in November.

CONTENTS OF THE BUDGET DOCUMENT

This Budget document begins with the Budget Highlights and the Operations & Maintenance (O&M) Area of Responsibility. The Budget Highlights offer a summary of Total Operating Revenue, Total Operating Expense, Operating Income (Loss), Change in Net Position and the Capital Program for each Division. The Operations & Maintenance Area of Responsibility offers an O&M organizational summary by division. The information provided in the remaining sections of the Budget document is detailed below.

ALL DIVISIONS

This section supplies a comparison of the Electric, Gas and Water Division's Income, Expense & Change in Net Position and Capital Expenditures Budget for the 2024 Budget.

ELECTRIC

The first page of this section (Page E4) is the *Income, Expense, and Changes in Net Position Comparison* for the Electric Division. It provides a side-by-side view of the 2022 Actual Expenditures, 2023 Budget and the 2024 Budget.

The last column contains a Reference Number that can be cross-referenced with the Appendix, which provides a brief explanation or description of that specific line item; for example, Sales Revenue has a reference number of 4-1. The Appendix includes notes for 4-1 on page A2 stating that "this account includes projected revenue from the sale of electricity to the residential, commercial, industrial, outdoor lighting and traffic signal and interdepartmental customer classes."

The next three pages (4a-4c) provide the detailed account information for each of the line items presented on page 4; for example, the four specific accounts for non-Sales Revenue are Forfeited Discounts, Miscellaneous Service Revenue, Other Operating Revenue and Rent from Gas/Water Property. The sum of these four accounts (Total non-Sales Revenue) is rolled up to page 4. The detail account information provides a comparison of the 2023 Budget, 2024 Budget and the difference between the 2023 Budget and 2024 Budget.

Next is the *Source and Application of Funds*, which includes reference numbers that correlate to the Appendices which provide a description of each line item.

The *Capital Expenditures Comparison* (page 6) gives a comparison of the 2022 Actual, 2023 Budget and the 2024 Budget. Again, the last column is the Reference Number that can be used to look up explanations of each line item. The next four pages (7-10) provide information by project for each of the major line items on page 6. Each project listed has the amount that will be spent in the Budget year. Every project has a reference number that can be used to find a description of the project in the Appendix.

How to Read the Budget

The last page of this section is the *Capital Carryover Summary*. Carryover dollars are funds that were budgeted in the previous year that were not utilized due to delays in projects, shortage of resources or commodities ordered but not received. These dollars are a component of the 2024 Budget figures.

GAS

The Gas Division section is set up in the same format as the Electric Division: *Income, Expense, and Changes in Net Position Comparison for the Gas Division; Sources and Applications of Funds; Capital Expenditures Comparison; and the Capital Carryover Summary*. Please refer to the Electric description above for information on how to read these sections.

WATER

The Water Division section is set up in the same format as the Electric Division: *Income, Expense and Changes in Net Position Comparison for the Water Division; Sources and Applications of Funds; Capital Expenditures Comparison and the Capital Carryover Summary*. Please refer to the Electric description above for information on how to read these sections.

CAPITAL IMPROVEMENT PLAN

This section presents the Division's 5-year capital improvement plan for the Electric, Gas, and Water Divisions' infrastructure by work order type (WOT).

APPENDIX

This section presents a definition and/or explanation of specific line items referenced throughout the Budget document. Each page includes a heading stating what page the information is referencing. For example, Page A1 has a heading of "Notes for Page 3 – Capital Expenditures Budget". This means that the notes for Page 3 begin here and each line item on page three is defined.

The Appendix also includes a Glossary that defines acronyms and other terms commonly used throughout this Budget document.

MEMPHIS LIGHT, GAS AND WATER DIVISION

Memphis Light, Gas and Water is owned by the City of Memphis and is the nation's largest three-service municipality in the United States with approximately 440,000 customers. MLGW operates three separate utilities, as divisions, providing electricity and gas in the City and Shelby County and water to the City in conjunction with other municipal systems in Shelby County. Memphis Light Gas and Water provides services to roughly 440,000 electric customers, 320,000 gas customers, and 257,000 water customers.

Memphis Light, Gas and Water receives electricity from the Tennessee Valley Authority (TVA) and represents approximately 10 percent of TVA's total electric power load. Memphis Light, Gas and Water acts as a pass through of the electric rates, therefore, not realizing any profit on the sale of electricity.

Memphis Light, Gas and Water provides natural gas to its customers via 3 natural gas pipelines. MLGW buys natural gas from a variety of natural gas suppliers in a mixture of monthly, daily, seasonally and long-term contracts while hedging gas purchases to manage the price risk associated with the market price volatility of natural gas.

While some utilities obtain drinking water from surface lakes or rivers, MLGW supplies water from the Memphis aquifer, beneath Shelby County. The Memphis aquifer is a treasure to the Memphis and Shelby County areas. The Memphis aquifer contains more than 100 trillion gallons of water that are more than 2,000 years old. MLGW operates this artesian well system by utilizing pumping stations and wells to deliver water to its customers.

Memphis Light, Gas and Water is comprised of various organizations and disciplines to ensure safe, reliable, and friendly service to our customers. MLGW is led by the President & CEO with oversight provided by the MLGW Board of Commissioners. Memphis Light, Gas and Water's leadership has a strong affinity for safety and customer services. The Division's leadership principles are exuded through the leadership team. MLGW leadership is comprised of the Senior Leadership Committee who oversee the daily operations of the Division.

MEMPHIS LIGHT, GAS AND WATER DIVISION

It takes an abundance of resources to operate a utility of this magnitude. Many think of the Division in terms of utilities only; however, daily operations include internal auditing, legal counsel, communication of community and external affairs, finance, information services and technology, human resources, engineering, construction, and customer services.

Memphis Light, Gas and Water develops the operating and capital expenditure budgets annually to coincide with its fiscal year. The annual budget considers the needs of the Division's operational units to assist the utility in its mission, *"To safely deliver services that create and sustain superior customer experiences"*. The next page provides an executive summary of the utility's leadership.

Memphis Light Gas and Water Leadership

Doug McGowen, President and Chief Executive Officer, Before joining MLGW as the 12th President & CEO, Doug McGowen served as Chief Operating Officer for Mayor Jim Strickland and the City of Memphis. As Chief Operating Officer, McGowen directly oversaw all city operating and department agencies. From March 2020 to March 2022, he also led Memphis and Shelby County COVID-19 Joint Task Force, coordinating all aspects of a successful pandemic response. Passionate about making Memphis a better place to live and work, McGowen also serves as Board Chair of the Mid-South American Heart Association and Board Chair for Explore Bike Share. Immediately prior to his COO role, he served as Director of the Innovation Team for the City of Memphis (now Innovate Memphis) and headed the Memphis Sexual Assault Kit Task Force. Prior to joining the city team, McGowen served as a commissioned officer in the United States Navy, retiring as a Captain in 2011 after 26 years of service. His last assignment was as Commanding Officer of the Naval Base in Millington, TN. McGowen also served as Commanding Officer of Strike Fighter Squadron ONE ZERO TWO, Chief Operating Officer for the US Navy Recruiting Command, and Chief Operating Officer for Carrier Air Wing NINE. During his career, McGowen completed multiple overseas deployments and participated in combat operations during Operations Desert Shield/Desert Storm and Operation Enduring Freedom flying the F-14 TOMCAT and later the FA-18F Super Hornet. McGowen holds a B.S. in Civil Engineering from Virginia Military Institute and an M.A. in National Security from the United States Naval War College. Born in Meadville, PA, McGowen and his family are proud to call Memphis home.

Dana Jeanes, Senior Vice-President, Chief Financial Officer and Chief

Administrative Officer (Secretary-Treasurer), is responsible for establishing, monitoring and maintaining company-wide financial and administrative objectives, policies, programs, and practices for MLGW. Mr. Jeanes joined MLGW in December 1987 and has served as Energy Engineer; Rates Engineer; Supervisor, Rates and Regulatory Affairs; Manager, Budget, Plant and Rates; Director of Analysis, Strategy, and Performance, and Controller. Mr. Jeanes received his Bachelor of Science in electrical engineering from Christian Brothers University in 1979 and a Master of Business Administration degree with emphasis on finance and accounting from the University of Memphis in 1994. He is a licensed professional engineer in Tennessee. He is a Certified Public Accountant and a member of the American Institute of Certified Public Accountants. Mr. Jeanes serves in several industry associations. He is a Board member and past President of the Tennessee Municipal Electric Power Association. He also serves on the Tennessee Valley Public Power Association Government Relations Committee and Rates and Contracts Committee. Mr. Jeanes also serves as a Director on the Board of the Better Business Bureau of the Mid-South.

Alonzo Weaver III, Senior Vice-President and Chief Operating Officer is responsible for managing and coordinating all engineering functions, facilities operations and loss prevention, electric substations, water pumping stations, gas regulators, and wells. Mr. Weaver joined MLGW in 1983 as an Engineering Assistant in Electric Operations and was promoted to Operations Assistant in that department in 1987. Mr. Weaver later served as Assistant Manager for the North Service Center before being promoted to Manager, Electric Operations in 1992. He was promoted to Vice President, Operations in 1997 and has served in various executive roles since that time. Mr. Weaver graduated from Rensselaer Polytechnic Institute with a B.S. in Mechanical Engineering in 1983 and attended the University of Memphis where he received an MBA in 1997. Mr. Weaver also attended Rhodes College Institute for Executive Leadership and completed the MLGW Executive Development Program in 1988. Mr. Weaver is active in several industry associations, such as the American Public Power Association, the American Public Gas Association, the American Association of Blacks in Energy, the American Gas Association and the North American Transmission Forum. He serves on the boards of the Southern Gas Association, SERC Reliability Corporation and Junior Achievement.

Jennifer Sink, Vice-President and General Counsel (Compliance Officer), is responsible for advising the Board and MLGW staff concerning all legal obligations and privileges, serves as Chief Ethics Officer for MLGW, and performs other legal services for MLGW. Before joining Memphis Light Gas and Water, Sink served as the Chief Legal Officer for the City of Memphis, providing legal counsel and strategic advice to the Mayor and Divisions of city government. Prior to joining the City Attorney's Office In 2016, Sink was a shareholder at the Baker, Donelson, Bearman, Caldwell and Berkowitz law firm, practicing civil litigations and primarily health care litigation from 2003-2016. Sink currently serves as the President-Elect (2023) of the Memphis Bar Association.

Rodney Cleek, Acting Vice-President of Accounting, Rodney Cleek is serving as Acting Vice President of Accounting in addition to his duties as Manager of Budget, Plant and Rates. Cleek is responsible for financial planning, asset accounting and rate management for MLGW. He joined MLGW in December 1999 as a rates engineer and was later promoted to Assistant Manager within the department. He received his Bachelor of Science in Electrical Engineering from the University of Memphis in 1995 and a Master of Business Administration degree from Christian Brothers University in 2002. Cleek is a professional engineer, a certified municipal finance officer and a certified energy manager. He currently serves on the board of the Engineers' Club of Memphis and is a graduate of the executive program of Leadership Memphis. Cleek is actively involved in his church and serves as a deacon.

Cliff DeBerry Jr., Vice-President of Design, Construction and Delivery, is responsible for managing and coordinating the delivery of construction and maintenance operations at Memphis Light, Gas and Water as well as Residential and Commercial Engineering Design, Lighting Services, and Builder and Developer Services. Mr. DeBerry joined MLGW in 1987 as a Level I Customer Engineer and was promoted to Assistant Manager for the Hickory Hill Service Center in 2000. He later served as Manager of Electric Engineering, Manager of Hickory Hill Service Center, and Director of Analysis, Strategy and Performance before being promoted to his current position. Mr. DeBerry graduated from Christian Brothers College (now CBU) with a B.S. in Electrical Engineering in 1987 and additionally received an MBA in Finance in 1994 from Memphis State University (now University of Memphis). He is a registered Professional Engineer licensed in the state of Tennessee. Mr. DeBerry is a commissioner for the West Tennessee Seismic Safety Commission, Board Member for the Mid-South Food Bank, Managing Operating Committee Member for the American Gas Association and an active member of the Engineers Club of Memphis where he served on the Board of Directors. Additionally, Mr. DeBerry has served as President of the American Association of Blacks in Energy and is a member of Alpha Phi Alpha Fraternity. He is a supporter of many community endeavors such as Junior Achievement, the United Way, the MS 150 Bike -A-Thon and Ride for Life.

Nicholas Newman, Vice-President of Engineering and Operations, is responsible for managing and coordinating all engineering and operational divisions for Memphis Light, Gas and Water. Mr. Newman joined MLGW in 1988 as a Service Engineer in the Customer Engineering Department. Mr. Newman previously served as a District Engineer; Supervisor of Engineering and Heavy Equipment; Assistant Manager and Manager of the South Service Center. Additionally, Mr. Newman served as the Project Manager for the Energy Conservation Project at NSA Mid-South. Mr. Newman is a native Memphian and graduate of Frayser High School. Mr. Newman earned his Bachelor of Science in Electrical Engineering and an MBA from the University of Memphis. Mr. Newman holds a Grade 2 Water Distribution License from the State of Tennessee. Mr. Newman is active in the American Water Works Association (AWWA), Tennessee Association of Utility Districts (TAUD) and several other associations. He is on the board of TAUD where he serves as Vice President and is the Chairperson for the legislative team. He also serves on the Tennessee Water/Wastewater Financing Board.

Von Goodloe, Vice-President of Shared Services, is responsible for managing Corporate Security, Facilities (Central Support Services), Transportation and Supply Operations, Procurement, Contracts and Supplier Diversity and Corporate Safety. Dr. Goodloe joined MLGW in 2010 as Vice President of Human Resources. Dr. Goodloe graduated from Hampton University with a B.A. in Physics in 1983, attended Trevecca Nazarene College in Nashville where he received an MEA degree in 1994, and received an EDS degree in Administration in 2009 from Union University. He also received his doctorate in education from Union University in 2011. Dr. Goodloe has his Senior Professional in Human Resources (SPHR) certification from the Society for Human Resources Management (SHRM) and Certified Labor Relations Professional (CLRP) certification from the National Public Employer Labor Relations Association (NPELRA). He is an active member of the Society for Human Resources Management (SHRM) and the National Public Employer Labor Relations Association (NPELRA). He is an active member of

Alpha Phi Alpha fraternity and a supporter of community agencies such as Life Blood, The United Way, and Junior Achievement.

Jacqueline Jones, Vice President and Chief People Officer, is responsible for developing and executing human resource strategy in support of the overall business plan and strategic direction of the organization, specifically in the areas of succession planning, talent management, change management, organizational and performance management, training and development, and compensation. She joined MLGW in December 2020. Prior to joining MLGW, she served in executive roles at Kraft Foods, Inc and Lennox International.

Jackie has a strong track record of human resource experience supporting management teams and employees through rapid change and growth. She is experienced in developing and executing strategic and tactical programs, driving enterprise people strategy, delivering on commitments, and creating a winning culture. Her well-rounded experience includes working in corporate and business unit environments as well as working in union/non-union manufacturing plants including both line and staff roles. Jackie's leadership style is highlighted by her ability to be a strategic thinker, courageous change agent and action-oriented leader with a high degree of interpersonal skills and credibility. Jones is a graduate of the University of Memphis where she received a BBA degree in Production Operations Management. She also holds an MBA from Edgewood College in Madison, WI.

Lashell Vaughn, Vice-President and Chief Information Officer, is responsible for information technology and services, data security, client services and enterprise resources support. Mrs. Vaughn joined MLGW in June 2011. Mrs. Vaughn previously held the position of Vice President of Information Technology with Hilton Worldwide. She has more than 35 years of experience in Information Technology, including client management, application development, data center operation, network and telecommunication, and security and compliance. Vaughn received a Master of Science in Computer Science from Christian Brothers University and a Bachelor of Science in Computer Science from Mississippi State University. She serves on the Dean's Advisory Council for the Mississippi State University Bagley College of Engineering and is Chairman of the Board for the Greater Memphis IT Council. She is a member of the Institute of Electronics Engineers, Inc. (IEEE) and the American Society for Engineering Education (ASEE).

Timothy Davis, Vice-President Customer Experience and Energy Services, is responsible for driving exceptional experiences for all customers and potential customers. Mr. Davis leads efforts to create customer-centric strategies and initiatives enhancing customer satisfaction throughout the company. Prior to joining MLGW in 2022, Mr. Davis was Director of Customer Service, Field Operations for Austin Energy. Mr. Davis held positions at San Antonio Water and Tucson Electric where he was responsible for all aspects of the Customer Experience, including Customer Engagement, Customer Programs, Sales, Energy Efficiency Programs, Customer Service Operations, Account Management, and Community Investment & Corporate Philanthropy. Mr. Davis earned a Bachelor of Science Degree in Business from the University of Redlands and a Master of Science Degree in Leadership & Management from the University of La Verne. Mr. Davis is also a graduate of the University of California's Executive Management Program, along with executive programs at the University of Chicago and University of Southern California.

Lesa Walton, Chief Internal Auditing Officer, is responsible for the overall operations of Internal Auditing functions to include developing, scheduling, and directing financial, operational, and administrative audit functions. This includes analyzing, reviewing and appraising the adequacy and effectiveness of system technologies and internal control for safeguarding MLGW's funds and assets. Walton joined MLGW in 2001 and has served as an Auditor, Senior Auditor, Supervisor of Management Accounting, General Auditor and most recently as Audit Director.

She received her B.S. in Accounting from the University of Arkansas at Little Rock in 1992, and a Master of Professional Accountancy from Jackson State University in 1994. She received her Certified Public Accountant (CPA) designation in 1998. Walton's previous employers include

TruGreen Chemlawn, a division of ServiceMaster, Inc., The Kroger Company and United American of Tennessee. She is a member of the American Institute of Certified Public Accountants (AICPA), Tennessee Society of Certified Public Accountants (TSCPA) and the Institute of Internal Auditors (IIA) where she serves as IIA Memphis Board of Governors. She is a supporter of community agencies such as The United Way, MIFA, and Junior Achievement. Walton is an active member of White Stone Missionary Baptist Church serving as Co-Chairperson of the Trustee Board, Chairperson of the Scholarship Committee and member of the Budget Committee.

CAPITAL CARRYOVER SUMMARY*
FOR CALENDAR YEAR OF 2024

ELECTRIC DIVISION

PAGE 12

<u>CAPITAL CARRYOVER CATEGORY</u>	<u>CARRYOVER AMOUNT</u>
Substations, Transmission & Distribution System	15,853,174
Power Operated and Transportation Equipment	8,543,091
Buildings & Structures	12,895,200
Purchase of Data Processing Equipment	11,050,000
CIS Info Systems Development	1,289,460
Business Continuity	420,000
Utility Monitoring	4,165,000
TOTAL CAPITAL CARRYOVER SUMMARY	54,215,925

*Carryover items constitute the funding necessary for capital projects or purchases not completed during the prior budget year. This would include projects which may have been delayed, large projects requiring multiple years to complete, or commodities ordered but not received. These items are part of the total 2024 Budget.

CAPITAL CARRYOVER SUMMARY*
FOR CALENDAR YEAR OF 2024

GAS DIVISION

PAGE 18

<u>CAPITAL CARRYOVER CATEGORY</u>	<u>CARRYOVER AMOUNT</u>
Power Operated and Transportation Equipment	3,115,873
Buildings & Structures	990,000
Distribution System	4,153,000
Data Processing- IS/IT	<u>280,000</u>
TOTAL CAPITAL CARRYOVER SUMMARY	<u>8,538,873</u>

*Carryover items constitute the funding necessary for capital projects or purchases not completed during the prior budget year. This would include projects which may have been delayed, large projects requiring multiple years to complete, or commodities ordered but not received. These items are part of the total 2024 Budget.

MEMPHIS LIGHT, GAS AND WATER DIVISION
CAPITAL CARRYOVER SUMMARY*
FOR CALENDAR YEAR OF 2024

WATER DIVISION

PAGE 25

<u>CAPITAL CARRYOVER CATEGORY</u>	<u>CARRYOVER AMOUNT</u>
Production	7,355,000
Distribution	250,000
Buildings & Structures	319,000
Power Transportation Equipment	1,218,914
TOTAL CAPITAL CARRYOVER SUMMARY	<u>9,142,914</u>

*Carryover items constitute the funding necessary for capital projects or purchases not completed during the prior budget year. This would include projects which may have been delayed, large projects requiring multiple years to complete, or commodities ordered but not received. These items are part of the total 2024 Budget.

2024 - 2028 CAPITAL IMPROVEMENT PROGRAM

2024 ELECTRIC 5-YEAR CAPITAL IMPROVEMENT PROGRAM

NOTES FOR PAGE 3—Capital Expenditures Budget

Total Capital Expenditures

3-1	Total Capital Expenditures	Expected capital spend in 2024 budget year.
-----	----------------------------	---------------------------------------------

ELECTRIC DIVISION

NOTES FOR PAGE 4—INCOME & EXPENSE COMPARISON

Operating Revenue

4-1	Sales Revenue	This account includes projected revenue from the sale of electricity to the residential, commercial, industrial, outdoor lighting and traffic signal, and interdepartmental customer classes.
4-2	Revenue Adjustment for Uncollectibles	Per Governmental Accounting Standards Board (GASB) 34 requirements, bad debt expense must be shown as a reduction of revenue. This is the amount that will not be collected due to customer's inability to pay.
4-3	Non-Sales Revenue	This account includes revenue from forfeited discounts (extra charges for payments received after net due date), plus rent charged for Electric Division property that is used by the Gas and Water Divisions, and other miscellaneous revenue (e.g., fees for connecting service).

Operating Expense

4-4	Purchased Power	This account includes the cost of electricity purchased from TVA for resale to customers.
4-5	Transmission Expense	This account includes the cost of labor and expenses incurred in the supervision and operation of the transmission system. Included are load dispatching operations, transmission substations, switching stations, overhead and underground line expenses, and miscellaneous transmission expenses. Included in this account are inspecting and testing circuit breakers, switches, breakers, load testing of circuits, line patrolling, and routine inspection of manholes, conduit, network and transformer vaults.
4-6	Distribution Expense	This account includes the cost of labor and expenses incurred in the supervision and direct labor of the operation of the distribution system. Included are direct switching, arranging and controlling clearances for construction, maintenance test and emergencies, communication services provided for system control purposes and controlling system voltages. Also included are the expenses for operation of the overhead and underground distribution lines and stations, street lighting, meter expenses, work on customer installations in inspecting premises and in rendering services to customers, miscellaneous expenses and rent.
4-7	Customer Accounts Expense	This account includes the cost of labor, materials and expenses used in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints. It also includes meter reading expenses.
4-8	Customer Service and Information Expense	This account includes the cost of labor, materials and expenses incurred in providing instructions or assistance to customers, the object of which is to encourage safe, efficient, and economical use of services, and activities which convey information in utilizing electric services to protect health and safety, to encourage environmental protection, to use electrical equipment safely and economically and to conserve electric energy.
4-9	Sales Expense	This account includes the cost of labor, materials and expenses incurred in promotional, demonstrating and selling activities, advertising designed to promote or retain the use of utility services and miscellaneous sales expense. Included are exhibitions, displays, lectures, engineering and technical advice, advertising in newspapers, periodicals, billboards, radio, etc., postage on direct mail advertising, printing booklets, bulletins, etc.
4-10	Administrative and General Expense	This account includes the compensation of board members, executives, and other administrative and general employees of the utility not chargeable directly to a particular operating function. It also includes the cost of insurance to protect the utility against physical plant losses, cost of reserve accruals to protect the utility against injuries and damage claims of employees or others, such as liability, property damage, casualty, and employee liability. Employee pensions and benefits including payments to pension funds, life insurance, group medical expenses, payments for accident, sickness, hospital and death benefits, and expenses in connection with educational and wellness activities are also included in this account. In accordance with GASB 45, <i>Accounting and Financial Reporting by Employers for Postemployment Benefits Other than Pension</i> , MLGW must recognize all post-employment benefits, such as medical insurance and life insurance, when earned, effective budget year 2007.

Maintenance Expense

4-11	Transmission Expense	This account includes the cost of labor, materials and expenses incurred in the maintenance of the transmission system, of structures, and station equipment. This includes maintenance of overhead lines and underground lines.
4-12	Distribution Expense	This account includes the cost of labor, materials, and expenses incurred in the maintenance of the distribution system, structures, plant, station equipment, overhead lines and underground lines, distribution line transformers, street lighting and signal systems, meters, and other miscellaneous distribution plant.
4-13	Administrative and General Expense	Please see Appendix 4-10.

NOTES FOR PAGE 4—INCOME & EXPENSE COMPARISON (Continued)

Other Operating Expense

4-14	Depreciation Expense	The purpose of depreciation is to allocate the original cost of a fixed asset over its estimated useful life. In a utility environment, the annual depreciation rate also takes into account the estimated salvage and cost of removal upon retirement.
4-15	Payment in Lieu of Taxes	Payment in lieu of taxes is the amount paid to the municipalities in which MLGW has plant. The formula for payment in lieu of taxes is based on the Municipal Electric System Tax Equivalent Law of 1987 and the Municipal Gas Equivalent Law which became effective July 1, 1988. The tax formula has two parts--net investment and revenue. The net investment includes plant in service and held for future use (net of depreciation), construction work-in-progress and materials inventory. The net investment is multiplied by an assessment ratio, the property tax rates for each governmental body, and an equalization rate set by the State. The revenue part of the formula is 4% of a three-year average of operating revenue less power cost.
4-16	F.I.C.A. Taxes	This represents the 1.45% Medicare portion of Social Security Tax which is required to be paid on all MLGW employees hired after 03-31-86.
4-17	Amortization of Legacy Meters	This account includes amortization charges related to expenditures on meters.
4-18	Amortization of Software	This account includes amortization charges related to expenditures on software.

Income

4-19	Operating Income	Operating income is equal to operating revenue less total operating expense.
4-20	Other Income	This consists primarily of investment income and property rentals and the electric prepayment agreement. It does not include any sales of electricity, gas or water.
4-21	Reduction of Plant Recovered through CIAC	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

Debt Expense

4-22	Interest Expense - Existing Long-Term Debt	Bond interest payments due 06-01 and 12-01 per the bond debt schedules are funded in equal monthly installments.
4-23	Amortization of Debt Discount and Expense	This represents the spreading of bond issuance costs over the life span of the bond series rather than recognizing such costs all at the time of sale.
4-24	Contributions in Aid of Construction	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

NOTES FOR PAGE 5- SOURCES AND APPLICATION OF FUNDS

Source of Funds

5-1	Change in Net Position	Please see Budget page 4c.
5-2	Depreciation Charged to Operating Income	Please see Appendix 4-14.
5-3	Depreciation Charged to Other Accounts	Depreciation charged to other accounts is the annual depreciation for transportation and power operated equipment. Depreciation on these plant items is charged to a clearing account and used in the equipment rate calculations.
5-4	Amortization of Legacy Meters	Non-cash expense related to amortization charges related to meter expenditures.
5-5	Amortization of Software	Non-cash expense related to amortization charges related to software expenditures.
5-6	Salvage	Salvage is the amount received for property retired from plant in service. The property may be sold for scrap or returned to stores inventory for reuse.
5-7	Debt Issuance	Expected debt issuance in the Electric Division for the 2024 budget year.

Application of Funds

5-8	Capital Expenditures	Please see Budget page 6.
5-9	Costs of Removal and Other Charges to the Reserve for Depreciation	Cost of removal is the cost associated with demolishing, dismantling, tearing down or otherwise removing utility plant, including the cost of transportation and labor.
5-10	Retirement of Long-Term Debt	Bond principal amounts due 12-01 per the bond debt schedules are funded in equal monthly installments during

NOTES FOR PAGE 6—CAPITAL EXPENDITURES

Production System

6-1	Distributive Energy Resource	Solar/battery storage generation sources located close to where electricity is used
-----	------------------------------	-------------------------------------------------------------------------------------

Substation and Transmission

6-2	Substation	Please see Appendix 7-3 through 7-17.
6-3	Substation Transformers Replacement	Please see Appendix 7-18 through 7-19.
6-4	Substation Circuit Breakers Replacement	Please see Appendix 7-20 through 7-25.
6-5	Transmission Lines	Please see Appendix 8-1 through 8-10.
6-6	Contributions in Aid of Construction	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes. Please see Appendix 8-12.

Distribution System

Major Projects

6-7	Residential Service in S/D	All subdivisions that are fed internally by overhead electric primary lines.
6-8	Residential Service Not in S/D	Property not in subdivisions fed internally by overhead electric primary lines.
6-9	Residential S/D	Other property not in subdivisions fed internally by overhead electric primary lines.
6-10	Apartments	All apartments and mobile home communities that are fed internally by overhead electric primary lines.
6-11	General Power Service	Commercial properties that are fed internally by overhead or underground electric primary lines
6-12	General Power S/D	Commercial properties in subdivisions that are fed internally by overhead or underground electric primary lines
6-13	Mobile Home Park	All apartments and mobile home communities that are fed internally by overhead electric primary lines. No expenditures for the 2024 budget year.
6-14	Temporary Service	Services used for temporary construction.
6-15	Multiple Unit General Power	Commercial properties and apartments that are fed internally by overhead or underground electric primary lines
6-16	Relocate At Customer Request	This budget category provides for the expenses incurred at customers request for facilities to be relocated.
6-17	Street Improvements	This budget category provides for the expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated. Please see Appendix 8-26 through 8-38.
6-18	New Circuits	Please see Appendix 8-11 through 8-23.
6-19	Line Reconstruction/Remove Idle Facilities	This category describes projects whereby existing distribution lines are improved and/or removed. These projects can include instances where existing circuits are rebuilt to create ties to other circuits to improve reliability to customers; conductors are upgraded to increase the current carrying ability of the circuit; devices such as switches, voltage regulators, capacitors, or reclosers are added to a circuit to improve voltage/reliability; or existing idle facilities are removed to decrease losses.
6-20	Defect Cable/Feeder Cable Replacement	This category describes the systematic retrofitting of the Division's Underground Residential Distribution system. The cable is replaced as it reaches end-of-life as determined by in service failures. Obsolete transformers and other distribution hardware are also replaced in this category. Cable replacement was initiated in 1982.
6-21	Distribution Poles	The budget includes utility poles used to support overhead power lines and various other public utilities, such as electrical cable, fiber optic cable, and related equipment such as transformers and street lights.
6-22	Distribution Automation	To install communications and hardware to allow for remote/automated operation to provide for more advanced restoration capabilities.

ELECTRIC DIVISION

NOTES FOR PAGE 6--CAPITAL EXPENDITURES (Continued)

Major Projects (Continued)

6-23	Street Lights Install	The budget includes work necessary to provide street light maintenance in existing subdivisions, along roadways, Memphis city annexations, and adjustments to lights in existing developments requested by the cities throughout the year.
6-24	Demolition	The budget includes demolition work.
6-25	Street Light Maintenance	The budget includes work necessary to provide street light maintenance in existing subdivisions, along roadways, Memphis city annexations, and adjustments to lights in existing developments requested by the cities throughout the year.
6-26	Planned Maintenance	Construction in minor work that arises daily. These are mainly calls that go through the Control Room, to include pole knockdowns, gas, and water leaks, etc.
6-27	Tree Trimming	Trim or remove trees interfering with overhead lines.
6-28	Operations Maintenance	No expenditures planned for the 2024 budget year.
6-29	Leased Outdoor Lighting (LOL)	LOL provides area and security lighting for residential, commercial and industrial customers in Memphis and Shelby County. LOL customers pay aid-to-construction for the installation of lighting fixtures and a monthly flat rate energy and facility fee. Services provided through LOL include engineering design of lighting systems to meet customer needs as well as building codes and standards. Installation and maintenance are handled through Distribution Support, using Division personnel and contracted labor.
6-30	Storm Restoration	This category shows actual expenditures for previous years related to storm restoration efforts. MLGW does not budget for unexpected storm related expenses. These storms are generally large enough to cause major damage to our electric distribution system. Funds expensed in this category are reimbursable by the Federal Emergency Management Agency.
6-31	Shared Use Contract	To account for small cell pole attachments.
6-32	Duct Line Lease	To account for leasing available duct line for fiber cable.
6-33	Emergency Maintenance	Emergency maintenance is minor capital unplanned work that arises daily. These are mainly calls that go through the Control Room, such as pole knockdowns, gas or water leaks, etc.
6-34	JT-Residential Service in S/D	All subdivisions that are fed internally by underground electric primary lines and all subdivisions and apartments that are joint trench (underground electric primary and gas in the same trench).
6-35	JT-Residential Service Not in S/D	All subdivisions that are fed internally by underground electric primary lines and all subdivisions and apartments that are joint trench (underground electric primary and gas in the same trench).
6-36	JT-Residential S/D	All subdivisions that are fed internally by underground electric primary lines and all subdivisions and apartments that are joint trench (underground electric primary and gas in the same trench).
6-37	JT-Apartments	All subdivisions that are fed internally by underground electric primary lines and all subdivisions and apartments that are joint trench (underground electric primary and gas in the same trench).
6-38	PCI-Capacitor Banks	Enhances the electrical supply quality and power systems efficiency
6-39	PCI- Dist. Transformers	Purchase, receive, test and stock overhead type transformers for the Overhead Electric Distribution System--inventory levels are closely managed based on growth, new construction, history, voltage conversions and failures.
6-40	Elec Meters	The Electric Meter Area's capital budget for the purchase of electric metering equipment along with installation of revenue metering at the gate stations.
6-41	Contributions in Aid of Construction	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

General Plant

6-42	Buildings and Structures	Please see Appendix 9-15 through 9-16.
6-43	Security Automation	Please see Appendix 9-22.
6-44	Land Purchase	Please see Appendix 9-14.
6-45	Fleet Capital Power Operated	Please see Appendix 10-1.
6-46	Transportation Equipment	Please see Appendix 10-2.
6-47	Lab & Test	Please see Appendix 10-4.
6-48	Communication Equipment	Please see Appendix 10-3.
6-49	Communication Towers	Please see Appendix 10-5.
6-50	Telecommunication Network	Please see Appendix 10-6 through 10-11.
6-51	Utility Monitoring	Please see Appendix 10-12.
6-52	Customer Information System (CIS) Development	Please see Appendix 10-13 through 10-14.
6-53	Business Continuity	Please see Appendix 10-15 through 10-16.
6-54	Data Processing Equipment	Please see Appendix 11-1 through 11-15.
6-55	IS/IT Projects	No expenditures planned for the 2024 budget year.
6-56	Contingency Fund	Please see Appendix 11-16.
6-57	Delayed Cost Allocations	These are funds budgeted in the current year for items that may arrive late from the previous year's budget.

NOTES FOR PAGE 7—CAPITAL EXPENDITURES BUDGET

Production

7-1	Generation/Solar/Battery Storage	Provides cheaper power, a better-quality grid, and cleaner power with lower emissions—oil reciprocating engines. Energy produced at one time for use at a later time to reduce imbalances between energy demand and production.
-----	-----------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Substation & Transmission

Substation

7-2	Install Substation 83 161/23kV Facilities	Description/Location	Various locations
		Purpose/Necessity	Substation 83 161/23kV Facilities build
7-3	Install Substation 76 third 115/12 kV transformer	Description/Location	Install Substation 76 third 115/12
		Purpose/Necessity	Substation 76
7-4	Replace RTU's various locations	Description/Location	Replace RTU's various locations
		Purpose/Necessity	Replace failed breakers
7-5	Replace relays various locations	Description/Location	Replace relays various locations
		Purpose/Necessity	Replace failed breakers
7-6	Replace capacitor banks various locations	Description/Location	Replace capacitor banks various locations
		Purpose/Necessity	To change out aging infrastructure
7-7	Substation Feeder Electromechanical Relay Replacement Program (Distribution)	Description/Location	Various locations
		Purpose/Necessity	Protects circuits from overcurrent, ground, faults, phase loss, overload, and other detrimental conditions
7-8	Replace batteries various locations	Description/Location	Replace batteries various locations
		Purpose/Necessity	To change out aging infrastructure
7-9	Replace Reactor Substation 1	Description/Location	Replace reactor various locations
		Purpose/Necessity	Substation 1
7-10	Sub #21 Install Reactors on Circuits 1617, 1619 & 1629	Description/Location	Replace reactors on circuits various locations
		Purpose/Necessity	Substation 21
7-11	Substation 4 OH/UG Conversion Ckts 2395 & 2397 (City of Memphis)	Description/Location	Replace OH/UG Conversion Ckts 2395 & 2397 (City of Memphis)
		Purpose/Necessity	Implement Breaker Fail Scheme
7-12	Install 161 kV CVT on Circuit 05697 @ Substation 5	Description/Location	Install 161 kV CVT on Circuit Breaker 05697
		Purpose/Necessity	Substation 5
7-13	Install JPAX Nodes to Upgrade JMUX SONET Nodes	Description/Location	Install JPAX Nodes
		Purpose/Necessity	Various locations
7-14	Install Transmission Metering Equipment for Transmission Planning Monitoring	Description/Location	Transmission Metering Equipment
		Purpose/Necessity	Transmission Metering Equipment
7-15	Contingency Replace Switches	Description/Location	Various locations
		Purpose/Necessity	Replace switches
7-16	Seismic Retrofit of Non-Structural Substation Components	Description/Location	Various locations
		Purpose/Necessity	Nonstructural anchorage, bracing or restraints for nonstructural control and metering equipment in substation control and oil buildings and in the electric operations/SCADA building. (2007 Multi-Hazard Risk Assessment)

NOTES FOR PAGE 7—CAPITAL EXPENDITURES BUDGET (Continued)

Substation/Transmission Projects (Continued)

Substation Transformers

7-17	Replace 161/23 kV transformer bank 43649 @ Substation 43	Description/Location	Substation 43
		Purpose/Necessity	Replacement of failed transformers at substations
7-18	Replace 115/12kV transformer bank 4059 @ Substation 14	Description/Location	Substation 14
		Purpose/Necessity	Replacement of failed transformers at substations

Substation Circuit Breakers

7-19	Replace 12 kV Breaker 1705, 1709, 1711, 1713, & 1739 @ Substation 11	Description/Location	Replace failed breakers
		Purpose/Necessity	Substation 11
7-20	Replace breakers various locations	Description/Location	Replace breakers various locations
		Purpose/Necessity	Replace failed breakers
7-21	Replace 161 kV Breakers 38625 38627 & 38659 @ Substation 38 (Aging Infrastructure)	Description/Location	Replace 161 kV Breakers 38625 38627 & 38659 @ Substation 38 (Aging Infrastructure)
		Purpose/Necessity	Substation 38
7-22	Replace 12 kV Breaker 5611 @ Substation 25	Purpose/Necessity	Replace 12 kV Breaker 5611 @ Substation 25
		Purpose/Necessity	Replace failed breakers
7-23	Replace 23 kV Breaker 4395 @ Substation 4	Description/Location	Replace 23 kV Breaker 4395 @ Substation 4
		Purpose/Necessity	Replace failed breakers
7-24	Replace 23 kV Breaker 5351 @ Substation 5	Description/Location	Replace 23 kV Breaker 5351 @ Substation 5
		Purpose/Necessity	Replace failed breakers

NOTES FOR PAGE 8—CAPITAL EXPENDITURES BUDGET

Substation/Transmission Projects (Continued)**Substation/Transmission Projects**

8-1	Structure #1613 Bank Stabilization (USACE Section 14 Funding)	Description/Location	Structure #1613 Bank Stabilization
		Purpose/Necessity	Bank Stabilization to prevent Tower #1613 from falling into Wolf River.
8-2	Misc. projects (OPGW, structure replacements, etc.)	Description/Location	Misc. projects (OPGW, structure replacements, etc.)
		Purpose/Necessity	Install small fiber communication jobs, structure replacements/upgrades and bank stabilization at various locations.
8-3	OPGW 11-35	Description/Location	OPGW 11 - 35
		Purpose/Necessity	Install fiber communication between Substations 11 & 35.
8-4	Sub 83 Cut-in	Description/Location	Substation 83
		Purpose/Necessity	Substation 83 Cut-in
8-5	OPGW 42-23	Description/Location	OPGW 42 - 23
		Purpose/Necessity	Install fiber communication between Substations 42 & 23.
8-6	Structure #1871 Bank Stabilization (USACE Section 14 Funding)	Description/Location	Structure #1871 Bank Stabilization
		Purpose/Necessity	USACE Section 14 Funding
8-7	LIDAR Survey Impacts (NERC)	Description/Location	LIDAR Survey Impacts (NERC)
		Purpose/Necessity	LIDAR Survey Impacts (NERC)
8-8	Days Creek Structure Relocation	Description/Location	Various locations.
		Purpose/Necessity	Various locations.

Transmission - Reimbursable

8-9	TDOT Lamar & Shelby Drive	Description/Location	TDOT Lamar & Shelby Drive
		Purpose/Necessity	Lamar & Shelby Drive
8-10	Contribution In Aid of Construction - CIAC	Description/Location	Contribution In Aid of Construction - CIAC
		Purpose/Necessity	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

Distribution System - Major Projects**New Circuits Out of Substations**

8-11	Sub 83	Description/Location	Install multiple circuit ties for station 83 circuits.
		Purpose/Necessity	Reliability and switching flexibility
8-12	Contingency Failed Stepdown Transformers/ Procure Spares	Description/Location	Replacement of failed transformers at various substations
		Purpose/Necessity	Replacement of failed transformers at various substations
8-13	New Ckt Sub 84 North	Description/Location	Install multiple circuit ties for station 84 circuits.
		Purpose/Necessity	Reliability and switching flexibility
8-14	Sub 83 Ckt Ties	Description/Location	Install multiple circuit ties for station 83 circuits.
		Purpose/Necessity	Reliability and switching flexibility
8-15	Circuit 44305 stepdown transformer change out	Description/Location	Circuit 44305 stepdown transformer change out
		Purpose/Necessity	Reliability and switching flexibility
8-16	Sub 83 Cabling (6 ckts)	Description/Location	Install multiple circuit ties for station 83 circuits.
		Purpose/Necessity	Reliability and switching flexibility
8-17	Other 2020-24 Projects	Description/Location	Install multiple circuit ties for Other Projects.
		Purpose/Necessity	Reliability and switching flexibility
8-18	Ckt Ties in Sub 15/84/68 Area	Description/Location	Install Ckt Ties in Sub 15/84/68 Area
		Purpose/Necessity	Reliability and switching flexibility
8-19	Sub 68 Cabling (3 ckts)	Description/Location	Install multiple circuit ties for station 68 circuits.
		Purpose/Necessity	Reliability and switching flexibility
8-20	Substation 84 Ckt Ties	Description/Location	Install multiple circuit ties for station 84 circuits.
		Purpose/Necessity	Reliability and switching flexibility
8-21	Schilling Farms Circuit Tie(s)	Description/Location	Install multiple circuits at Schilling Farms
		Purpose/Necessity	Reliability and switching flexibility
8-22	Kellogg's Alternate CKT Upgrade	Description/Location	Kellogg's Alternate CKT upgrade
		Purpose/Necessity	Reliability and switching flexibility
8-23	Circuit 61301 stepdown transformer change out	Description/Location	Circuit 61301 stepdown transformer change out
		Purpose/Necessity	Reliability and switching flexibility

Miscellaneous Reimbursable Projects

8-24	Pinch District Improvements	Description/Location	Downtown area
		Purpose/Necessity	This project will relocate/improve electric facilities in conjunction with the proposed improvements to the Pinch District in downtown Memphis.
8-25	Other Relocate at Customer Request Projects	Description/Location	Downtown area
		Purpose/Necessity	Relocating/improving electric facilities in conjunction with the proposed improvements in various areas at customers request.

NOTES FOR PAGE 9-CAPITAL EXPENDITURES BUDGET

Street Improvement Projects

9-1	Elvis Presley Blvd. North and Middle Section	Description/Location	Eves Presley Corridor-North and Middle Section
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-2	SR-4/US-78/Lamar, south of SR-175/Shelby Dr. to Raines/Perkins Interchange Phase 2	Description/Location	SR-4/US-78/Lamar, south of SR-175/Shelby Dr. to Raines/Perkins Interchange Phase 2
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-3	Other Projections 2023-2027	Description/Location	Other Projections 2023-2027
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-4	Hacks Cross Rd, Stateline to Shelby Dr	Description/Location	Hacks Cross Road, Stateline to Shelby Drive
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities.
9-5	Germantown Road @Wolf River Blvd (GT 16/01)	Description/Location	Germantown Rd. at Wolf River Blvd.
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-6	LL 09/02 - New Canada Rd. (Re-Alignment N of I-40 to US-70)	Description/Location	LL 09/02 - New Canada Rd. (Re-Alignment N of I-40 to US-70)
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-7	Holmes Road, Malone to US-78/Lamar (CP 04/38)	Description/Location	Holmes Road, Malone to US-78/Lamar (CP 04/38)
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-8	Malone, Holmes to Shelby Drive	Description/Location	Malone, Holmes to Shelby Drive
		Purpose/Necessity	Relocate utilities Malone, Holmes to Shelby Drive
9-9	Navy Road, Phase 2, Church to Veterans Pkwy	Description/Location	Navy Road, Phase 2, Church to Veterans Pkwy
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-10	Bartlett Road Bridge over Fletcher Creek	Description/Location	Bartlett Road Bridge over Fletcher Creek
		Purpose/Necessity	Relocate utilities Bartlett Road Bridge over Fletcher Creek
9-11	New Allen @ Ridgemont - Roundabout	Description/Location	New Allen Road and Ridgemont
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-12	Dexter Lane north of Rainsong Cove Drainage	Description/Location	Dexter Lane north of Rainsong Cove Drainage
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities
9-13	Carnes Ave/ Hanley School Safety Improvements	Description/Location	Carnes Avenue
		Purpose/Necessity	Relocate utilities for proposed street improvement project by TDOT or municipalities

ELECTRIC DIVISION

NOTES FOR PAGE 9—CAPITAL EXPENDITURES BUDGET (Continued)

General Plant

Buildings and Structures

9-14	Purchase of Land	Description/Location	Land purchase or the acquisition of land rights for distribution and transmission line facilities.
		Purpose/Necessity	To accommodate electric facilities, transmission lines, feeder circuits, etc.
Substations			
9-15	Replace Roofs - Various Substations	Description/Location	Various Substations
		Purpose/Necessity	This project was identified in the Master Roof Plan to be replaced at this time due to increased maintenance, potential leaking, and projected life expectancy.

Electrical & Systems Operations

9-16	New Storeroom Building	Description/Location	Needed to store special material purchased by the electric groups that are not purchased and managed by stores.
		Purpose/Necessity	New Storeroom Building

Netters Business Operations Center

9-17	Replace 5 Liebert CRAC Units/Roof Condensers & Leak detection System	Description/Location	Netters Business Operations Center
		Purpose/Necessity	Replace 5 liebert CRAC units/roof condensers and leak detection system
9-18	Replace Cooling Tower Fill Media	Description/Location	Netters Business Operations Center
		Purpose/Necessity	Replace cooling tower fill media

New Buildings

9-19	Building Upgrades	Description/Location	Building upgrades
		Purpose/Necessity	Building upgrades
9-20	Expansion Property Site Development	Description/Location	Expansion property north of Choctaw
		Purpose/Necessity	Purchased property (Choctaw); site development which includes fencing, automatic gate, roads and stored items.
9-21	EV Charging Stations	Description/Location	Electric Vehicle charging stations
		Purpose/Necessity	Electric Vehicle charging stations
9-22	Security Automation	Description/Location	Various locations
		Purpose/Necessity	Install card readers on control house doors, install a CCTV system, install fence alarms and various security upgraded throughout the division.

NOTES FOR PAGE 10-CAPITAL EXPENDITURES BUDGET

General Plant (Continued)

10-1	Fleet Capital Power Operated Equipment	Description/Location	Division equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items, in order to provide equipment for crews to complete job assignments. Replacements are evaluated based on age, actual operational usage, projected usage, repair cost and frequency, parts availability, and effectiveness to meet areas needs. Additions are evaluated based on justification request and proper approval.
10-2	Transportation Equipment	Description/Location	Division equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items, in order to provide equipment for crews to complete job assignments. Replacements are evaluated based on age, actual operational usage, projected usage, repair cost and frequency, parts availability, and effectiveness to meet areas needs. Additions are evaluated based on justification request and proper approval.
10-3	Communication Equipment	Description/Location	Control Area for Communication Equipment
		Purpose/Necessity	To satisfy the Division needs for Electric Communication Equipment for the Budget. The replacement policy is broken down into the following categories: 1. Lost or Stolen; 2. Damaged Beyond Repair; 3. Not Repairable/No Abuse; 4. Obsolete
10-4	Lab & Test	Description/Location	Control Area for Lab & Test Equipment
		Purpose/Necessity	To satisfy the Division needs for Electric Laboratory Equipment. The replacement policy is broken down into the following categories: 1. Lost or Stolen; 2. Damaged Beyond Repair; 3. Not Repairable/No Abuse; 4. Obsolete

Communication Towers

10-5	Microwave/Mobile Radio	Description/Location	Reconfigure microwave loop for Netters radio tower
		Purpose/Necessity	Installation of Netters radio tower requires reconfiguration of microwave loop
Telecommunication Network			
10-6	Distribution Automation Communication Infrastructure	Description/Location	Wireless and fiber infrastructure across Shelby County
		Purpose/Necessity	Upgrading communications infrastructure, wireless and fiber, to provide a reliable and resilient network for operation of Distribution Automation by Electric Operations during electrical service interruptions.
10-7	Voice Network	Description/Location	Replace Administration Building telephone switch
		Purpose/Necessity	Replace obsolete switch; reconfigure voice system to have three "master" switches that provide service to all MLGW facilities instead of separate switches at each location.
10-8	Smart Meter/SCADA Network Improvements	Description/Location	Memphis and Shelby County
		Purpose/Necessity	Installation of Distribution Automated Switches to improve responsiveness and aid in reducing customer minutes interrupted. Projected to install over 1100 automated distribution switches over a five year period.
10-9	Fiber Optic Multiplexers	Description/Location	Purchase and install fiber optic end equipment (places light on the optical fibers and "makes them work") at various locations.
		Purpose/Necessity	Enable communications over proposed fiber optic cable.
10-10	Fiber Optic Cable and Equipment	Description/Location	Install fiber optic cable at various locations.
		Purpose/Necessity	Provide fiber optic communications to specified facilities.
10-11	Telecommunication Systems Growth	Description/Location	Telecom systems growth - various locations. This is to cover unplanned and unforeseen Telecom expenditures that typically occur.
		Purpose/Necessity	Previous Telecom budgets had separate line items for systems growth in Mobile Radio, Fiber Optic, Microwave, Voice Recorder, Video Conferencing, Audio Conferencing, Voice System etc. This item consolidates the separate items.

Utility Monitoring & Control Systems

10-12	Systems Backup Control & Communication Plan (CO)	Description/Location	SCADA and CARES Systems long-term development
		Purpose/Necessity	Support long-term development of SCADA and CARES systems which involves implementation of backup system, upgrade of SCADA communications systems which includes relocating communication paths from ESO to fiber ring.

Customer Info System (CIS) Development

10-13	IRV and Call Center Expansion Project	Description/Location	The current IVR system does not allow MLGW to make its own changes. The vendor must make the changes to the IVR system. The new system would allow MLGW to make changes as needed to better meet customer needs and improve customer experience.
		Purpose/Necessity	To improve customer ease of use and experience.
10-14	BillGen Replacement (Carryover)	Description/Location	Replace the current BillGen system.
		Purpose/Necessity	GSA-3 customers may become Time Of Use (TOU) customers in October 2018. The current BillGen would not be able to handle these additional customers.

Business Continuity

10-15	Business Continuity/Disaster Recovery Site	Description/Location	DR/BC Recovery Site
		Purpose/Necessity	This is a multi-year project upgrade disaster recovery systems to include an out-region location
10-16	Data Center Enhancements Connectivity Improvements	Description/Location	Improve Data Center Operations
		Purpose/Necessity	To upgrade connectivity core infrastructure to support failover of critical systems between two data centers.

NOTES FOR PAGE 11-CAPITAL EXPENDITURES BUDGET

Purchase of Data Processing Equipment

11-1	HPE Storage Area Network (SAN) Replacement/Expansion	Description/Location	Storage Area Network Replacement
		Purpose/Necessity	To replace three (3) 9-year-old Storage Area Network (SAN) arrays at two data centers. These arrays consist of about 1.9 Peta Bytes (PB) of data which host data and virtual server environments.
11-2	SAN Fiber Channel Switches	Description/Location	SAN Fiber Channel Switches
		Purpose/Necessity	Use in a dedicated storage area network (SAN), inspects a data packet header, determines the computing devices of origin and destination and forwards the packet to the intended system.
11-3	Field Use Laptop Replacements	Description/Location	Field Use Laptop Replacements
		Purpose/Necessity	The current CF31s have been in production for 5 years and the extended warranty will expire in 2023. These are the Crew reporting Toughbooks.
11-4	Replace Enterprise Backup Systems	Description/Location	Replace Enterprise Backup Systems
		Purpose/Necessity	Replace storage to backup systems for physical and virtual onsite backups with replication between data centers.
11-5	Artificial Intelligence (AI) Project	Description/Location	Artificial Intelligence Project
		Purpose/Necessity	The implementation of artificial intelligence software with advanced search capabilities is needed to improve decision making by using data mining to quickly convert data to useful information with an augmented digital assistant.
11-6	Server Blades and Chassis for Computer Systems	Description/Location	Server Blades and Chassis for Computer Systems
		Purpose/Necessity	Houses essential hardware components, such as a central processing unit (CPU), memory, storage, and networking interfaces.
11-7	Network Core Upgrade and Enhancements	Description/Location	Wireless Networking
		Purpose/Necessity	Increase coverage area and reliability of the wireless network by adding new access points, replacing or upgrading end-of-life equipment.
11-8	DNS/DHCP System Replacement	Description/Location	Virtual Server Infrastructure
		Purpose/Necessity	Add additional server blade capacity to existing farm which will increase capacity for up to 1000 virtual servers running across 2 data centers.
11-9	New/Replacement Servers	Description/Location	Annual New/Replacement Servers
		Purpose/Necessity	Purchase or replace existing servers which have reached end-of-life and will no longer be supported by the manufacturer.
11-10	Work Center Wireless (outdoor)	Description/Location	Work Center Wireless (outdoor)
		Purpose/Necessity	To expand MLGW's wireless outdoor network at North, South, Hickory Hill and Brunswick service centers.
11-11	Blade Center Frame Expansion	Description/Location	Blade Center Frame
		Purpose/Necessity	Houses essential hardware components, such as a central processing unit (CPU), memory, storage, and networking interfaces.
11-12	Network Security Upgrades and Enhancements	Description/Location	Network Security
		Purpose/Necessity	Increase network security by replacing or upgrading end-of-line equipment and adding new security equipment.
11-13	NERC Virtual Server Environment	Description/Location	NERC Virtual Server Environment
		Purpose/Necessity	Creates multiple server instances from one physical server.
11-14	PC Equipment (Capital)	Description/Location	PC equipment (above \$5,000 unit cost) requested for various reasons
		Purpose/Necessity	PC equipment requested for various reasons including: additional functionality, laptops with docking stations to replace desktop PCs, and laptops needing replacement ahead of schedule due to software requirements.
11-15	ArcGIS Pro Virtualization Server	Description/Location	ArcGIS Pro Virtualization Server
		Purpose/Necessity	Lowers the cost of hardware by dividing a single server into several virtual private servers.
11-16	Contingency Fund - General Plant	This is an estimated budget amount to cover unforeseen emergency items that may arise in the current year.	

GAS DIVISION

NOTES FOR PAGE 12—INCOME & EXPENSE COMPARISON

Operating Revenue

12-1	Sales Revenue	This account includes projected revenue from the sale of natural gas to the residential, commercial, industrial, and interdepartmental customer classes.
12-2	Revenue Adjustment for Uncollectible	Per Governmental Accounting Standards Board (GASB) 34 requirements, bad debt expense must be shown as a reduction of revenue. This is the amount that will not be collected due to customers inability to pay.
12-3	Non-Sales Revenue	This account includes revenue from forfeited discounts (extra charges for payments received after net due date), plus rent charged for Gas Division property that is used by the Electric and Water Divisions, other miscellaneous revenue (e.g., fees for connecting/disconnecting service), and charges for transporting gas, CNG and LNG within the MLGW system for those industrial customers who arrange for purchase of their gas from suppliers other than MLGW.

Operating Expense

12-4	Production – LNG Plant	This account includes the cost of expenses incurred in the cost of fuel used in extracting salable products from natural gas and of operation of storage facilities and equipment.
12-5	Purchased Gas	This account includes the cost of natural gas and transportation of this gas to be used for injection into the system for resale.
12-6	Compressed Natural Gas (CNG)	This account includes the cost of compressed natural gas and transportation of this gas to be used for injection into the system for resale.
12-7	Liquefied Natural Gas (LNG)	This account includes the cost of liquefied natural gas and transportation of this gas to be used for injection into the system for resale.
12-8	Industrial Gas	This account includes the cost of industrial gas and transportation of this gas to be used for injection into the system for resale.
12-9	Distribution Expense	This account includes the cost of labor and expenses incurred in the operation of the distribution system. Included are costs incurred in dispatching and controlling the supply and flow of the gas through the distribution system, in operating system mains and services, in operating general distribution measuring and regulating stations, and in removing, resetting, changing, testing, and servicing customer meters and house regulators. Also included in this account are the expenses incurred in work on customer premises, rents and other expenses.
12-10	Customer Accounts Expense	This account includes the cost of labor, materials and expenses used in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints. It also includes meter reading expenses.
12-11	Customer Service and Information Expense	This account includes the cost of labor, materials and expenses incurred in providing instructions or assistance to customers, the object of which is to encourage safe, efficient, and economical use of services, and activities which convey information in utilizing services to protect health and safety, to encourage environmental protection, to use electrical equipment safely and economically and to conserve energy.
12-12	Sales Expense	This account includes the cost of labor, materials and expenses incurred in promotional, demonstrating and selling activities, advertising designed to promote or retain the use of utility services and miscellaneous sales expense. Included are exhibitions, displays, lectures, engineering and technical advice, advertising in newspapers, periodicals, billboards, radio, etc., postage on direct mail advertising, printing booklets, bulletins, etc.
12-13	Administrative and General Expense	This account includes the compensation of board members, executives, and other administrative and general employees of the utility not chargeable directly to a particular operating function. It also includes the cost of insurance to protect the utility against physical plant losses, cost of reserve accruals to protect the utility against injuries and damage claims of employees or others, such as liability, property damage, casualty, and employee liability. Employee pensions and benefits including payments to pension funds, life insurance, group medical expenses, payments for accident, sickness, hospital and death benefits, and expenses in connection with educational and wellness activities are also included in this account. In accordance with GASB 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other than Pension, MLGW must recognize all post-employment benefits, such as medical insurance and life insurance, when earned, effective budget year 2007.

Maintenance Expense

12-14	Production Expense	This account includes the cost of labor, materials and expenses incurred in the maintenance of liquefaction equipment, of measuring and regulating equipment, structures, station equipment and other equipment.
12-15	Distribution Expense	This account includes the cost of labor, materials and expenses incurred in the maintenance of distribution facilities, of structures, of distribution mains, of measuring and regulating equipment, of services, and of meters and house regulators.
12-16	Administrative and General Expense	Please see Appendix 12-13.

GAS DIVISION

NOTES FOR PAGE 12—INCOME & EXPENSE COMPARISON (Continued)

Other Operating Expense

12-17	Depreciation Expense	The purpose of depreciation is to allocate the original cost of a fixed asset over its estimated useful life. In a utility environment, the annual depreciation rate also takes into account the estimated salvage and cost of removal upon retirement.
12-18	Payment in Lieu of Taxes	Payment in lieu of taxes is the amount paid to the municipalities in which MLGW has plant. The formula for payment in lieu of taxes is based on the Municipal Electric System Tax Equivalent Law of 1987 and the Municipal Gas Equivalent Law which became effective July 1, 1988. The tax formula has two parts -- net investment and
12-19	F.I.C.A. Taxes	This represents the 1.45% Medicare portion of Social Security Tax that is required to be paid on all MLGW employees hired after 03-31-1986.
12-20	Amortization of Legacy Meters	This account includes amortization charges related to expenditures on meters.
12-21	Amortization of Software	This account includes amortization charges related to expenditures on software.

Income

12-22	Operating Income	Operating income is equal to operating revenue less total operating expense.
12-23	Other Income	This consists primarily of investment income and property rentals. It does not include any sales of electricity, gas or water.
12-24	Reduction of Plant Recovered through CIAC	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

Debt Expense

12-25	Interest Expense -Long Term Debt	Bond interest payments due 06-01 and 12-01 per the bond debt schedules are funded in equal monthly installments.
12-26	Amortization of Debt Discount & Expense	This represents the spreading of bond issuance costs over the life span of the bond series rather than recognizing such costs all at the time of sale.
12-27	Contributions in Aid of Construction	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

NOTES FOR PAGE 13—SOURCES AND APPLICATION OF FUNDS

Source of Funds

13-1	Change in Net Position	Please see Budget page 13.
13-2	Depreciation Charged to Operating Income	Please see Budget page 13.
13-3	Depreciation Charged to Other Accounts	Depreciation charged to other accounts is the annual depreciation for transportation and power operated equipment. Depreciation on these plant items is charged to a clearing account and used in the equipment rate calculations.
13-4	Amortization of Legacy Meters	Non-cash expense related to employee pension expenses above or below actual funding due to change in accounting principles.
13-5	Amortization of Software	Non-cash expense related to amortization charges related to software expenditures.
13-6	Salvage	Salvage is the amount received for property retired from plant in service. The property may be sold for scrap or returned to stores inventory for reuse.

Applications of Funds

13-7	Capital Expenditures	Please see Budget page 13.
13-8	Costs of Removal and Other Charges to the Reserve for Depreciation	Cost of removal is the cost associated with demolishing, dismantling, tearing down or otherwise removing utility plant, including the cost of transportation and labor.
13-9	Retirement of Long-Term Debt	Bond principal amounts due 12-01 per the bond debt schedules are funded in equal monthly installments during 2024.

GAS DIVISION

NOTES FOR PAGE 14—CAPITAL EXPENDITURES BUDGET

Production System

14-1	LNG Processing Facilities	LNG Processing Facilities- Purchase and installation of regeneration heating equipment, replacement of existing 20 year old equipment.
------	----------------------------------	----------------------------------------------------------------------------------------------------------------------------------------

Distribution System

14-2	Apartments	This budget category provides for the expenses incurred by the Gas Division for developer requests for gas facilities located in a subdivision.
14-3	Residential Service in S/D	This budget category provides for the expenses incurred by the Gas Division for customer requests for service located in a subdivision.
14-4	Residential Service Not in S/D	This budget category provides for the expenses incurred by the Gas Division for customer requests for service not located in a subdivision.
14-5	Residential S/D	This budget category provides for the expenses incurred by the Gas Division for developer requests for gas facilities located in a subdivision.
14-6	Operations Maintenance	Construction in minor work that arises daily. These are mainly calls that go through the Control Room, to include pole knockdowns, gas, and water leaks, etc.
14-7	Land Purchase	This budget category provides for the purchase of land rights that will be needed for Capital Budget Projects.
14-8	General Power Service	This budget category provides for the expenses incurred by the Gas Division for customer requests for new General Power Service.
14-9	General Power S/D	This budget category provides for the expenses incurred by the Gas Division for customer requests for new General Power Service located in a subdivision.
14-10	Multiple-Unit General Power	This budget category provides for the expenses incurred by the Gas Division for customer requests for multiple units of new General Power Service by the same customer and general location.
14-11	Relocate At Customer Request	This budget category provides for the expenses incurred by the Gas Division for customer requests to relocate existing gas facilities.
14-12	Purchase of Meters	This budget category provides for the expenses incurred from buying new gas meters and reconditioning existing gas meters.
14-13	Street Improvements	This budget category provides for the expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated. Please see Appendix 15-2 through 15-25.
14-14	New Gas Main	This budget category provides for the expenses incurred for the installation of miscellaneous new gas mains and facilities.
14-15	Gas Main/Service Repl (D.O.T.)	This budget category provides for replacement of old cast iron main that requires excessive maintenance and that has a history of leaking. This is a 30 year project that began in 1991 and was requested by the TN Regulatory Authority to replace 330 miles an was completed in 2021. This budget category also provides for replacement of steel taps and associated services, if needed, that have a history of leaking. This is a program initiated by DIMP findings.
14-16	Planned Maintenance	Construction in minor work that arises daily. These are mainly calls that go through the Control Room, to include pole knockdowns, gas, and water leaks, etc.
14-17	Transmission Pipelines and Facilities	This budget category provides for the expenses incurred for maintenance of cased gas transmission crossings required by regulatory changes, minor repair of transmission pipelines from scheduled inspections, and minor transmission improvements.
14-18	Regulator Stations	This budget line item provides for the expenses incurred from upgrading obsolete regulator station equipment. The DOT Code mandates that regulators must be maintained to operate within the design parameters of the gas distribution system.
14-19	Gate Stations	This budget line item provides for the expenses related to gas piping systems that are discovered to be unsafe due to corrosion defects, aged facilities, third party damages, or necessary relocations due to erosion problems for transmission as well as distribution.
14-20	JT-Residential Service in S/D	This budget category provides for the expenses incurred by the Gas Division for customer requests for gas facilities in a joint trench subdivision.

Distribution System (Continued)

14-21	JT-Residential Service not in S/D	This budget category provides for the expenses incurred by the Gas Division for developer requests for gas facilities in a joint trench subdivision.
14-22	JT-Residential S/D	This budget category provides for the expenses incurred by the Gas Division for developer requests for gas facilities in a joint trench subdivision.
14-23	JT-Apartments	This budget category provides for the expenses incurred by the Gas Division for developer requests for gas facilities in a joint trench apartment development.
14-24	Emergency Maintenance	This budget line item provides for emergency repair work when leaks and cut facilities require immediate repair.
14-25	Demolition	No expenditures planned for the 2024 budget year.
14-26	Contributions in Aid of Construction	This budget line item provides for the payment that was predicted to be received from the developer and/or customer for the requested gas facilities to serve their development, businesses and/or new homes.

NOTES FOR PAGE 14—CAPITAL EXPENDITURES BUDGET (Continued)

General Plant

14-27	Buildings and Structures	Please see Appendix 16-7 through 16-17.
14-28	Security Automation	Please see Appendix 16-18.
14-29	Purchase of Furniture & Fixtures	No expenditures planned for the 2024 budget year.
14-30	Audiovisual	Please see Appendix 16-19.
14-31	IS/IT Projects	Please see Appendix 17-6.
14-32	Fleet Capital Common Power Operated Equip	Please see Appendix 17-1.
14-33	Fleet Capital Common Transportation Equip	Please see Appendix 17-2.
14-34	Fleet Gas Power Operated Equipment	Please see Appendix 17-3.
14-35	Fleet Gas Transportation Equipment	Please see Appendix 17-4.
14-36	Automated Fueling Structure	Please see Appendix 17-5
14-37	Tools & Equipment	No expenditures planned for the 2024 budget year.
14-38	Common Tools & Equipment	No expenditures planned for the 2024 budget year.
14-39	Contingency Funds	Please see Appendix 17-7.
14-40	Delayed Cost Allocations	These are funds budgeted in the current year for items that may arrive late from the previous year's budget.

GAS DIVISION

NOTES FOR PAGE 15—CAPITAL EXPENDITURES BUDGET

Production System

15-1	LNG Processing Facilities	Description/Location	Projects related to Capital Maintenance of the Capleville Liquefied Natural Gas Facility.
		Purpose/Necessity	Projects related to Capital Maintenance of the Capleville Liquefied Natural Gas Facility.

Distribution System- Major Projects

Street Improvements

15-2	Holmes Rd, Malone Rd to Lamar Ave.	Description/Location	Holmes Rd, Malone Rd to Lamar Ave
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-3	CP 19/10, Innovation Corridor, WO1252099, in design	Description/Location	Innovation Corridor
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-4	Directional Drilling	Description/Location	Drilling non-vertical bores at various locations.
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-5	SP 03/10, SR-4/US-78 from Shelby Dr - Raines/Perkins- CH 86, WO430806	Description/Location	SR-4/US-78 from Shelby Dr to Raines/Perkins
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-6	CV 18/04, Shelby Dr, east of Sycamore Rd to US-72, WO1077517, in design	Description/Location	Shelby Drive, East of Sycamore Road to US-72
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-7	LL 09/02 Canada Rd, Re-Alignment, WO288164	Description/Location	Canada Rd
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-8	ML 21/04, Navy Rd, Phase2, Church - Veterans Pkwy, Preliminary Plans	Description/Location	Navy Rd., Phase 2 Church - Veterans Pkwy
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-9	SC 19/02, Hacks Cross Rd, Stateline - Shelby Dr, WO756495, in design	Description/Location	Hacks Cross Rd, Stateline to Shelby Dr
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-10	CP 05/15, Malone Rd, Holmes to Shelby	Description/Location	Holmes Rd to Shelby Drive
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-11	GT 16/01, Germantown Rd at Brierbrook, W8Q43005	Description/Location	Germantown Rd at Brierbrook
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.
15-12	CP 16/07, S Germantown Rd, N of Nonconnah Tl, WO662236, released	Description/Location	S. Germantown Rd. N of Nonconnah Tl
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.

15-25	Carnes Ave/Hanley School Safety Improvements	Description/Location	Carnes Ave
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.

New Gas Main

15-26	System Improvement Projections	Description/Location	System Improvement Projections
		Purpose/Necessity	Expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated for the drainage, elevation changes and/or new sewer facilities.

Gas Main/Service Repl (D.O.T.)

15-27	Steel Tap Rep Replacement	Description/Location	Location(s) vary due to system prioritization needs and City paving schedules.
		Purpose/Necessity	This budget category provides for replacement of steel couplings on steel service taps that requires excessive maintenance and has a history of leaking.
15-28	Distribution Integrity Management Program (DIMP)	Description/Location	Locations vary due to system needs.
		Purpose/Necessity	Planned work to address risks to the distribution system, undocumented mains.
15-29	Unplanned Distribution Work	Description/Location	Locations vary due to system needs.
		Purpose/Necessity	This budget category provides for the expenses incurred from replacing steel services, valves or mains with new PE services, valves and mains due to a CP issue that must be addressed in that calendar year.
15-30	Corrosion Control	Description/Location	Locations vary due to system needs.
		Purpose/Necessity	This budget category provides for the expenses incurred from replacing steel services, valves or mains with new PE services, valves and mains due to a CP issue that must be addressed in that calendar year.

GAS DIVISION

NOTES FOR PAGE 16–CAPITAL EXPENDITURES BUDGET

Transmission Pipelines and Facilities

16-1	Transmission Integrity Management Program (TIMP)	Description/Location	TIMP Initiative
		Purpose/Necessity	Pressure tests and other work on transmission piping required by PHMSA to confirm MAOP, Replace sections of transmission pipeline in MCA, Install pig launchers and receivers.
16-2	18" XXHP Pipeline Replacement @ Covington Pike & LNRR	Description/Location	18" XXHP Pipeline Replacement @ Covington Pike & LNRR
		Purpose/Necessity	This budget line item provides for the expenses related to gas piping systems that are discovered to be unsafe due to corrosion defects, aged facilities, third party damages, or necessary relocations due to erosion problems for transmission as well as distribution.
16-3	Unplanned Transmission Work	Description/Location	Various locations.
		Purpose/Necessity	Pressure tests and other work on transmission piping required by PHMSA to confirm MAOP, Replace sections of transmission pipeline in MCA, Install pig launchers and receivers.

Regulator Stations

16-4	Regulator Station Replacement	Description/Location	Regulator station replacement
		Purpose/Necessity	Regulator stations are used to reduce the pressure of the gas to the appropriate operating pressure for each system

Gate Station

16-5	Germantown Gate Station Retrofit	Description/Location	Germantown
		Purpose/Necessity	Gate Station Retrofit
16-6	Gate Station Work	Description/Location	Gas Station Work
		Purpose/Necessity	Gas Station Work

General Plant

Buildings and Structures

North Service Center

16-7	Building #8 (Re-cover over Stores 160,668 square foot	Description/Location	North Service Center
		Purpose/Necessity	All roof replacement projects are targeted in the Facilities master plan based on expected life expectancy and existing maintenance issues.
16-8	Asphalt Paving & Concrete Slabs/ Drives - Phase 2	Description/Location	North Service Center
		Purpose/Necessity	This project was identified in the Master Plan. All asphalt drives, parking areas are in very bad shape. Also, there is a need to pave areas for safe movement of material.
16-9	Building #8 (Re-cover over office 24,000 square foot roof)	Description/Location	North Service Center
		Purpose/Necessity	This project was recommended to store Building Services and Grounds' chemicals used for facility maintenance activities.
16-10	AC Installation Building #6	Description/Location	North Service Center
		Purpose/Necessity	This project is for AC installation.
16-11	Building #2: (Re-cover 36,000 square foot roof)	Description/Location	North Service Center
		Purpose/Necessity	This project is for roof improvements.
16-12	Building #3: (Re-cover 30,650 square foot roof)	Description/Location	North Service Center
		Purpose/Necessity	This project is for roof improvements.
16-13	Building #6: Roof Replacement 23,684 square feet	Description/Location	North Service Center
		Purpose/Necessity	This project is for roof replacement.
16-14	Building #1 Replace 3 HVAC Package Units	Description/Location	North Service Center
		Purpose/Necessity	This project is for replacing three HVAC package units.

General Plant (Continued)

Buildings and Structures

Utility Support Center

16-15	Upgrades & Enhancements	Description/Location	Utility Support Center
		Purpose/Necessity	Upgrades and enhancements.

LNG Capleville

16-16	Replace Control House Roof	Description/Location	LNG Capleville
		Purpose/Necessity	All roof replacement projects are targeted in the Facilities master plan based on expected life expectancy and existing maintenance issues.
16-17	Metal Storage Building (50' x 100')	Description/Location	LNG Capleville
		Purpose/Necessity	Metal storage building
16-18	Security Automation	Description/Location	Division security automation equipment used for work in and around Shelby County.
		Purpose/Necessity	Security Automation
16-19	Audiovisual	Description/Location	Division audiovisual equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items, in order to provide equipment for employees to complete job assignments. Tools are considered replacements for the following reasons: i. Damaged beyond repair; ii. Worn from time/age/use, cost does not justify repair; iii. Lost/Stolen report submitted in a timely manner; iv. No longer suited for work being done, replace with a new model; v. Safety hazard; vi. Repair cost is at or above 50% of cost of new tool; vii. High occurrence of maintenance that creates excessive downtime.

GAS DIVISION

NOTES FOR PAGE 17-CAPITAL EXPENDITURES BUDGET

17-1	Fleet Capital Common Power Operated Equipment	Description/Location	Division vehicles/equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items, in order to provide equipment for employees to complete job assignments. Tools are considered replacements for the following reasons: i. Damaged beyond repair; ii. Worn from time/age/use, cost does not justify repair; iii. Lost/Stolen report submitted in a timely manner; iv. No longer suited for work being done, replace with a new model; v. Safety hazard; vi. Repair cost is at or above 50% of cost of new tool; vii. High occurrence of maintenance that creates excessive downtime.
17-2	Fleet Capital Common Transportation Equipment	Description/Location	Division vehicles/equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items, in order to provide equipment for employees to complete job assignments. Tools are considered replacements for the following reasons: i. Damaged beyond repair; ii. Worn from time/age/use, cost does not justify repair; iii. Lost/Stolen report submitted in a timely manner; iv. 17-3	Fleet Gas Power Operated Equipment	Description/Location	Division vehicles/equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items, in order to provide equipment for employees to complete job assignments. Tools are considered replacements for the following reasons: i. Damaged beyond repair; ii. Worn from time/age/use, cost does not justify repair; iii. Lost/Stolen report submitted in a timely manner; iv. No longer suited for work being done, replace with a new model; v. Safety hazard; vi. Repair cost is at or above 50% of cost of new tool; vii. High occurrence of maintenance that creates excessive downtime.
17-4	Fleet Gas Transportation Equipment	Description/Location	Division vehicles/equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items, in order to provide equipment for employees to complete job assignments. Tools are considered replacements for the following reasons: i. Damaged beyond repair; ii. Worn from time/age/use, cost does not justify repair; iii. Lost/Stolen report submitted in a timely manner; iv. No longer suited for work being done, replace with a new model; v. Safety hazard; vi. Repair cost is at or above 50% of cost of new tool; vii. High occurrence of maintenance that creates excessive downtime.
17-5	Gas - Automated Fueling Structure	Description/Location	Automated fueling structure
		Purpose/Necessity	Automated fueling structure

IS/IT Projects

17-6	ETRM Phase 2 Project	Description/Location	Energy Trading and Risk Management
		Purpose/Necessity	Replace SCADA/Cares consoles
17-7	Contingency Fund - General Plant	This is an estimated budget amount to cover unforeseen emergency items that may arise in the current year.	

WATER DIVISION

NOTES FOR PAGE 18—INCOME & EXPENSE COMPARISON

Operating Revenue

18-1	Sales Revenue	This account includes projected revenue from the sale of water to the residential, commercial, resale, and interdepartmental customer classes, as well as revenue from fire protection services.
18-2	Revenue Adjustment for Uncollectible	Per Governmental Accounting Standards Board (Water) 34 requirements, bad debt expense must be shown as a reduction of revenue. This is the amount that will not be collected due to customers inability to pay.
18-3	Non-Sales Revenue	This account includes revenue from forfeited discounts (charges for payments received after net due date), plus rent charged for Water Division property that is used by the Electric and Water Divisions, and other miscellaneous revenue (e.g., fees for connecting/disconnecting service).

Operating Expense

18-4	Production Expense	This account includes the cost of labor and expenses incurred in the general supervision and operation of the water source of supply facilities, the power production and pumping facilities, and the water treatment expenses. Also included is the fuel used in the production of power to operate the pumps, all chemicals used in the treatment of water and miscellaneous expenses including general clerical labor, building services, general operating supplies and care of grounds.
18-5	Distribution Expense	This account includes the cost of labor and expenses incurred in the operation of distribution reservoirs and tanks, meter expenses, customer installation expenses and miscellaneous expenses including preparing maps and prints, general clerical support, operating records, service interruption, trouble records, and other miscellaneous labor.
18-6	Customer Accounts Expense	This account includes the cost of labor and expenses incurred in the reading of customer meters, in customer applications, orders, contracts, credit investigations, billing and accounting, collections and complaints.
18-7	Customer Service and Information Expense	This account includes the cost of labor and expenses incurred in customer service and informational activities, the purpose of which is to encourage safe and efficient use of the utility's services, to promote the conservation of the utility's services and to assist customers in answering specific inquiries as to the proper and economic use of the utility's services.
18-8	Sales Expense	This account includes the cost of labor, materials and expenses incurred in promotional, demonstrating and selling activities, advertising designed to promote or retain the use of utility services and miscellaneous sales expense. Included are exhibitions, displays, lectures, engineering and technical advice, advertising in newspapers, periodicals, billboards, radio, etc., postage on direct mail advertising, printing booklets, bulletins, etc.
18-9	Administrative and General Expense	This account includes the compensation of board members, executives, and other administrative and general employees of the utility not chargeable directly to a particular operating function. It also includes the cost of insurance to protect the utility against physical plant losses, cost of reserve accruals to protect the utility against injuries and damage claims of employees or others, such as liability, property damage, casualty, and employee liability. Employee pensions and benefits including payments to pension funds, life insurance, group medical expenses, payments for accident, sickness, hospital and death benefits, and expenses in connection with educational and wellness activities are also included in this account. In accordance with Water 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other than Pension, MLGW must recognize all postemployment benefits, such as medical insurance and life insurance, when earned, effective budget year 2007.

Maintenance Expense

18-10	Production Expense	This account includes the labor and expenses incurred in the maintenance of structures and improvements, collecting and impounding reservoirs, maintenance of wells, the maintenance of observation wells, the maintenance of structures and improvements used in connection with pumping, maintenance of power production equipment used directly in pumping operations, the maintenance of pumping equipment, maintenance of structures and improvements to the water treatment plant, and water treatment plant equipment.
18-11	Distribution Expense	This account includes the labor and expenses incurred in the maintenance of the distribution system including structures and improvements, mains, services, meters, meter testing equipment, fire hydrants, and miscellaneous plant.
18-12	Administrative & General Expense	Please see Appendix 18-9.

WATER DIVISION

NOTES FOR PAGE 18—INCOME & EXPENSE COMPARISON (Continued)

Other Operating Expense

18-13	Depreciation Expense	The purpose of depreciation is to allocate the original cost of a fixed asset over its estimated useful life. In a utility environment, the annual depreciation rate also takes into account the estimated salvage and cost of removal upon retirement.
18-14	Payment In Lieu of Taxes	MLGW and the City of Memphis have agreed on a P.I.L.O.T. in the amount of \$2,500,000 to be made on an annual basis to the City from the revenues of the Water Division through fiscal years 2028.
18-15	F.I.C.A. Taxes	This represents the 1.45% Medicare portion of Social Security Tax that is required to be paid on all MLGW employees hired after 03-31-1986.
18-16	Amortization of Legacy Meters	This account includes amortization charges related to expenditures on meters.

Income

18-17	Operating Income	Operating income is equal to operating revenue less total operating expense.
18-18	Other Income	This consists primarily of interest and investment income. It does not include any sales of electricity, gas or water.
18-19	Reduction of Plant Recovered through CIAC	Contributions-in-aid-of-construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

Debt Expense

18-20	Interest Expense – Existing Long-Term Debt	Bond interest payments due 06-01- and 12-01 per the bond debt schedules are funded in equal monthly installments.
18-21	Amortization of Debt Discount & Expense	This represents the spreading of bond issuance costs over the life span of the bond series rather than recognizing such costs all at the time of sale.
18-22	Contributions in Aid of Construction	Please see Appendix 20-22.

WATER DIVISION

NOTES FOR PAGE 19—INCOME & EXPENSE COMPARISON

Source of Funds

19-1	Change in Net Position	Please see page 19.
19-2	Depreciation Charged to Operating Income	Please see page 19.
19-3	Depreciation Charged to Other Accounts	Depreciation charged to other accounts is the annual depreciation for transportation and power operated equipment. Depreciation on these plant items is charged to a clearing account and used in the equipment rate calculations.
19-4	Amortization of Legacy Meters	Non-cash expense related to employee pension expenses related to meter expenditures.
19-5	Salvage	Salvage is the amount received for property retired from plant in service. The property may be sold for scrap or returned to stores inventory for reuse.

Application of Funds

19-6	Capital Expenditures	Please see page 19.
19-7	Costs of Removal and Other Charges to the Reserve for Depreciation	Cost of removal is the cost associated with demolishing, dismantling, tearing down or otherwise removing utility plant, including the cost of transportation and labor.
19-8	Retirement of Long-Term Debt	Bond principal amounts due 12-01 per the bond debt schedules are funded in equal monthly installments during.

WATER DIVISION

NOTES FOR PAGE 20—CAPITAL EXPENDITURES BUDGET

Production System

20-1	Pumping Stations	Please see Appendix 21-1 to 22-11.
20-2	Underground Storage Reservoirs	Please see Budget page 20.
20-3	Production Wells	Please see Budget page 20.
20-4	Land Purchase	Please see Budget page 20.
20-5	Operations Maintenance	Please see Budget page 20.
20-6	Contingency Fund - Production	Please see Budget page 20.
20-7	Buildings and Structures - Production System	Please see Budget page 20.
20-8	Contributions in Aid of Construction	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

Distribution System

20-9	Residential Service in S/D	This budget category provides for the expenses incurred by the Water Division for customer requests for service located in a subdivision.
20-10	Residential Service not in S/D	This budget category provides for the expenses incurred by the Water Division for customer requests for service not located in a subdivision.
20-11	Residential S/D	This budget category provides for the expenses incurred by the Water Division for developer requests for Water facilities located in a subdivision.
20-12	Apartments	This budget category provides for the expenses incurred by the Water Division for developer requests for Water facilities for new apartment developments.
20-13	General Power Service	This budget category provides for the expenses incurred by the Water Division for customer requests for new General Power Service.
20-14	Relocate At Customer Request	This budget category provides for the expenses incurred to relocate at the customer's request.
20-15	Street Improvements	This budget category provides for the expenses incurred when City, State and Federal Street Improvements dictate that facilities must be relocated. Please see Appendix 23-8 through 23-14.
20-16	New Water Main	This budget category provides for the expenses incurred for the installation of miscellaneous new water mains and facilities.
20-17	Lead Service Replacement	Replace lead services with copper at known locations throughout Shelby County.
20-18	Storm Restoration	No expenditures planned for the 2024 budget year.
20-19	Purchase of Meters	The number of meters purchased is based on projections for the coming year. These meters include meters that will be paid for by customer contributions relating to new residential and commercial development and replacement of existing meters.
20-20	Planned Maintenance	Construction in minor work that arises daily. These are mainly calls that go through the Control Room, to include pole knockdowns, gas, and water leaks, etc.
20-21	Booster Stations	This budget category is used to boost constant supply.
20-22	Emergency Maintenance	This budget line item provides for emergency repair work when leaks and cut facilities require immediate repair.
20-23	Contributions in Aid of Construction	Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.

General Plant

20-24	Buildings and Structures	Please see Appendix 23-3 through 23-10
20-25	Security Automation	Please see Appendix 24-9.
20-26	Fleet Capital Power Operated Equip	Please see Appendix 24-10.
20-27	Fleet Capital Water Transportation Equip	Please see Appendix 24-11.
20-28	Contingency Fund	This is an estimated budget amount to cover unforeseen emergency items that may arise in the current year. See Appendix 24-12.
20-29	Delayed Cost Allocations	These are funds budgeted in the current year for items that may arrive late from the previous year's budget.

NOTES FOR PAGE 21—CAPITAL EXPENDITURES BUDGET

Production System

Pumping Stations

Allen Pumping Station

21-1	Station Rehabilitation (New Allen)	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
21-2	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
21-3	VFD, Motor & Transformer Replacements	Description/Location	Design, Construction Administration and Integration needed to replace high service pump drive equipment.
		Purpose/Necessity	The existing VFD's chronically overheat and replacement parts are unavailable when the VFD's fail.
21-4	Dedicated Well Electric Circuit Replacement	Description/Location	Dedicated Well Electric Circuit Replacement
		Purpose/Necessity	The existing underground electric loop for the Allen wells is currently not reliable and causes well downtime. Moving the wells to overhead electric will make wells more reliable.

Davis Pumping Station

21-5	Filter Media Rehab and Replacement (Station Rehab)	Description/Location	Davis Pumping Station
		Purpose/Necessity	Filter media rehab and replacement.
21-6	Station Rehabilitation (CO)	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
21-7	Medium Voltage Breaker & Switchgear Replacements	Description/Location	Design, purchase and installation of the 12kV and 5 kV circuit breakers/Switchgear.
		Purpose/Necessity	Parts for the existing 12kV and 5 kV Circuit Breakers are unavailable and there are safety concerns related to the existing breakers

Lichterman Pumping Station

21-8	Station Rehabilitation (CO)	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
21-9	VFD, Motor & Transformer Replacements	Description/Location	Design, Construction Administration and Integration needed to replace high service pump drive equipment.
		Purpose/Necessity	The existing VFD's chronically overheat and replacement parts are unavailable when the VFD's fail.
21-10	Medium Voltage Breaker & Switchgear Replacements	Description/Location	Design, purchase and installation of the 12kV and 5 kV circuit breakers/Switchgear.
		Purpose/Necessity	Parts for the existing 12kV and 5 kV Circuit Breakers are unavailable and there are safety concerns related to the existing breakers

LNG Pumping Station

21-11	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.

WATER DIVISION

NOTES FOR PAGE 21—CAPITAL EXPENDITURES BUDGET (Continued)

Pumping Stations (Continued)

Mallory Pumping Station

21-12	Filter Media Rehab and Replacement (Station Rehab)	Description/Location	Mallory Pumping Station
		Purpose/Necessity	Filter media rehab and replacement
21-13	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
21-14	Medium Voltage Breaker & Switchgear Replacements	Description/Location	Design, purchase and installation of the 12kV and 5 kV circuit breakers/Switchgear.
		Purpose/Necessity	Parts for the existing 12kV and 5 kV Circuit Breakers are unavailable and there are safety concerns related to the existing breakers

McCord Pumping Station

21-15	Install Distributed Process Control System Replacement	Description/Location	Design, Construction Administration and Integration needed to replace the existing distributed process control system.
		Purpose/Necessity	The existing DPC system is outdated and parts can no longer be obtained for the existing controller. This is needed for regulatory compliance with Tennessee Department of Environment and Conservation standards.
21-16	VFD, Motor, Transformer Replacements	Description/Location	Design, Construction Administration and Integration needed to replace high service pump drive equipment.
		Purpose/Necessity	The existing VFD's chronically overheat and replacement parts are unavailable when the VFD's fail.
21-17	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
21-18	Medium Voltage Breaker & Switchgear Replacements	Description/Location	Design, purchase and installation of the 12kV and 5 kV circuit breakers/Switchgear.
		Purpose/Necessity	Parts for the existing 12kV and 5 kV Circuit Breakers are unavailable and there are safety concerns related to the existing breakers
21-19	Engineer Distributed Process Control System Replacement	Description/Location	Design, Construction Administration and Integration needed to replace the existing distributed process control system.
		Purpose/Necessity	The existing DPC system is outdated and parts can no longer be obtained for the existing controller. This is needed for regulatory compliance with Tennessee Department of Environment and Conservation standards.

WATER DIVISION

NOTES FOR PAGE 22—CAPITAL EXPENDITURES BUDGET

Pumping Stations (Continued)

Morton Pumping Station

22-1	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
22-2	VFD, Motor, Transformer Replacements	Description/Location	Design, Construction Administration and Integration needed to replace high service pump drive equipment.
		Purpose/Necessity	The existing VFD's chronically overheat and replacement parts are unavailable when the VFD's fail.

Palmer Pumping Station

22-3	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.

Pumping Stations (Continued)

Shaw Pumping Station

22-4	VFD, Motor, Transformer Replacements	Description/Location	Design, Construction Administration and Integration needed to replace the existing distributed process control system.
		Purpose/Necessity	The existing DPC system is outdated and parts can no longer be obtained for the existing controller. This is needed for regulatory compliance with Tennessee Department of Environment and Conservation standards.
22-5	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.

Sheehan Pumping Station

22-6	Station Rehabilitation	Description/Location	The purchase and installation of replacement valves, piping, hardware, meters, actuators, etc.... Rehabilitation of concrete structural components.
		Purpose/Necessity	The existing infrastructure can no longer be operated safely or reliably.
22-7	VFD, Motor, Transformer Replacements	Description/Location	Design, Construction Administration and Integration needed to replace high service pump drive equipment.
		Purpose/Necessity	The existing VFD's chronically overheat and replacement parts are unavailable when the VFD's fail.
22-8	Medium Voltage Breaker & Switchgear Replacements	Description/Location	Design, purchase and installation of the 12kV and 5 kV circuit breakers/Switchgear.
		Purpose/Necessity	Parts for the existing 12kV and 5 kV Circuit Breakers are unavailable and there are safety concerns related to the existing breakers

Pickel Pumping Station

22-9	Engineer Water Treatment Plant	Description/Location	Pickel Pumping Station
		Purpose/Necessity	Design, construction, and maintenance needed for water treatment plants.

Miscellaneous Pumping Facilities

22-10	Engineering Services Contract (CO)	Description/Location	Engineering Consultants on an "as-needed" basis. / As-needed.
		Purpose/Necessity	Water E&O has a need to retain Engineering Consultants on an "as-needed" basis. / Water Engineering does not have the expertise to perform certain engineering functions.
22-11	Water Operations Capital Items (CO)	Description/Location	This item is to account for unplanned Capital Items. / As-needed
		Purpose/Necessity	This is a projected budget amount to cover unforeseen Capital Items in the current year due to mechanical/electrical/etc. failure. / When equipment breaks, it must be fixed.

WATER DIVISION

NOTES FOR PAGE 22—CAPITAL EXPENDITURES BUDGET (Continued)

Underground Storage Reservoirs

Sheehan Pumping Station

22-12	Engineer Wash Recovery Basin Replacement	Description/Location	Construction of WWRB.
		Purpose/Necessity	The existing WWRB is the retrofitted Equalizing Basin. The operational performance of the existing WWRB is very poor. There are regulatory issues with the existing WWRB.

Production Wells

Morton Pumping Station

22-13	Construct/Replace Well	Description/Location	Construction of a large water production well.
		Purpose/Necessity	A number of the wells need to be replaced.
<u>Lichterman Pumping Station</u>			
22-14	Construct/Replace Well	Description/Location	Construction of a large water production well.
		Purpose/Necessity	A number of the wells need to be replaced.

McCord Pumping Station

22-15	Construct/Replace Well	Description/Location	Construction of a large water production well.
		Purpose/Necessity	A number of the wells need to be replaced.

Miscellaneous Pumping Facilities

22-16	Well Failures	Description/Location	Construction of a large water production well. Various pumping station.
		Purpose/Necessity	Water production wells fail unexpectedly and need to be replaced.
22-17	Well Generators	Description/Location	Various locations.
		Purpose/Necessity	Water production well generators need to be replaced.
22-18	Abandon Wells	Description/Location	To abandon water production wells that have reached the end of life.
		Purpose/Necessity	Well abandonment is needed to drill second generation wells on the same well site.

WATER DIVISION

NOTES FOR PAGE 23—CAPITAL EXPENDITURES BUDGET

Operations Maintenance

23-1	Operations Maintenance	Description/Location	Maintenance necessary for the continuation of normal operations
		Purpose/Necessity	Maintenance necessary for the continuation of normal operations

Land Purchase

23-2	Land Purchase	Description/Location	Purchase water production well lots/Various locations.
		Purpose/Necessity	Well lots are needed to install new/replacement water production wells to provide an adequate source water supply for customers.

Buildings and Structures

McCord Pumping Station

23-3	Replace Site Paving	Description/Location	McCord Pumping Station
		Purpose/Necessity	This project is needed to replace the paving. The existing paving is past it's life expectancy and needs to be repaired.
23-4	Reroof Main Building (15,930 sf)	Description/Location	McCord Pumping Station
		Purpose/Necessity	This project is needed to replace roof.
23-5	Aerator Bldg: Replace Roof (6,825 sf)	Description/Location	McCord Pumping Station
		Purpose/Necessity	This project is needed to replace roof.

Mallory Pumping Station

23-6	Roof Replacement (Design/Construction)	Description/Location	Mallory Pumping Station
		Purpose/Necessity	This project is needed to replace roof.

Palmer Pumping Station

23-7	Aerator Bldg: Replace Roof - \$5,800 - Design money held over before Design reclass as O&M	Description/Location	Palmer Pumping Station
		Purpose/Necessity	This project is needed to replace roof.

Allen Pumping Station

23-8	Roof Replacement (Design/Construction); Aerator Bldg	Description/Location	Allen Pumping Station
		Purpose/Necessity	This project is needed to replace roof.

Morton Pumping Station

23-9	Aerator Bldg and Pump Rm: Replace Roofs	Description/Location	Morton Pumping Station
		Purpose/Necessity	This project is needed to replace roof.

Sheahan Pumping Station

23-10	Repave Drives	Description/Location	Sheahan Pumping Station
		Purpose/Necessity	This project is needed to repave drives. The existing pavement is past it's life expectancy and is getting frequent requests.

Contingency Fund

23-11	Contingency Funds		This is an estimated budget amount to cover unforeseen emergency items that may arise in the current year.
-------	-------------------	--	------------------------------------------------------------------------------------------------------------

CIAC

23-12	Contributions in Aid of Construction		Contributions in aid of construction are the donations or contributions of cash, services, or property from states, municipalities, or other governmental agencies, individuals, and others for construction purposes.
-------	--------------------------------------	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

NOTES FOR PAGE 23—CAPITAL EXPENDITURES BUDGET (Continued)

Distribution System

New Water Main

23-13	Collecting Main Installation	Description/Location	Various locations
		Purpose/Necessity	The ties bring water from the aquifer to the plant.
23-14	Miscellaneous Projects - Reimbursable	Description/Location	This line item covers former SCBPU projects aimed at improving the Distribution System in former SCBPU areas of the county. These projects mostly center around improvements in the Shelby Forest area.
		Purpose/Necessity	This line item covers former SCBPU projects aimed at improving the Distribution System in former SCBPU areas of the county.
23-15	Large Main Extensions	Description/Location	Large Main Extensions
		Purpose/Necessity	Provides more water to parts of Shelby County were there is a need or future need to more water.
23-16	Major Valve Replacements/Additions	Description/Location	The project will involve the replacement and additions of 12" and larger valves
		Purpose/Necessity	Replacement of non-functioning and key valves and adding strategically place valves on primary and secondary feeders to optimize the ability to isolate large mains while minimizing the number of cut off customers
23-17	Main Replacement Projects	Description/Location	Older cast iron mains in older parts of town sometimes break several times and it is more feasible to replace the main.
		Purpose/Necessity	Older cast iron mains in older parts of town sometimes break several times and it is more feasible to replace the main.
23-18	Minor System Improvements	Description/Location	Minor System Improvements to Water Distribution System
		Purpose/Necessity	Minor System Improvements to Water Distribution System.

WATER DIVISION

NOTES FOR PAGE 24—CAPITAL EXPENDITURES BUDGET

Street Improvements

24-1	City of Memphis Projects	Description/Location	These are street improvement projects done by the City of Memphis requiring the relocation of MLGW water mains.
		Purpose/Necessity	MLGW will meet the utility relocation needs of the City, County, and State for their street improvement projects.
24-2	City of Lakeland Projects	Description/Location	These are street improvement projects done by the City of Lakeland requiring the relocation of MLGW water mains.
		Purpose/Necessity	MLGW will meet the utility relocation needs of the City, County, and State for their street improvement projects.
24-3	Miscellaneous Projects	Description/Location	Miscellaneous Projects
		Purpose/Necessity	MLGW will meet the utility relocation needs of the City, County, and State for their street improvement projects.
24-4	TDOT Projects	Description/Location	These are street improvement projects done by TDOT requiring the relocation of MLGW water mains.
		Purpose/Necessity	MLGW will meet the utility relocation needs of the City, County, and State for their street improvement projects.
24-5	Shelby County Projects	Description/Location	These are street improvement projects done by Shelby County requiring the relocation of MLGW water mains.
		Purpose/Necessity	MLGW will meet the utility relocation needs of the City, County, and State for their street improvement projects.
24-6	City of Arlington Projects	Description/Location	These are street improvement projects done by Shelby County requiring the relocation of MLGW water mains.
		Purpose/Necessity	MLGW will meet the utility relocation needs of the City, County, and State for their street improvement projects.
24-7	City of Bartlett Projects	Description/Location	These are street improvement projects done by the City of Bartlett requiring the relocation of MLGW water mains.
		Purpose/Necessity	MLGW will meet the utility relocation needs of the City, County, and State for their street improvement projects.

Lead Replacement

24-8	Lead Replacement	Description/Location	Lead Replacement
		Purpose/Necessity	Lead Replacement

General Plant

24-9	Security Automation	Description/Location	Various locations
		Purpose/Necessity	Install card readers on control house doors, install a CCTV system, install fence alarms and various security upgrades throughout the division.
24-10	Fleet Capital Power Operated Equipment	Description/Location	Division vehicles/equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items in order to provide equipment for crews to complete job assignments. Replacements are evaluated based on age, actual operational usage, repair cost and frequency, parts availability, and effectiveness to meet area's needs. Additions are evaluated based on justification request and proper approval.
24-11	Fleet Capital Transportation Equipment	Description/Location	Division vehicles/equipment used for work in and around Shelby County.
		Purpose/Necessity	To purchase approved budget items in order to provide equipment for crews to complete job assignments. Replacements are evaluated based on age, actual operational usage, repair cost and frequency, parts availability, and effectiveness to meet area's needs. Additions are evaluated based on justification request and proper approval.
24-12	Contingency Funds – General Plant	Description/Location	This is an estimated budget amount to cover unforeseen emergency items that may arise in the current year.

GLOSSARY

ACD: Automatic Call Distributor.

ACSR: Aluminum, Cable Steel Reinforced cable.

ADA: Americans with Disabilities Act.

BNSF: Burlington Northern Santé Fe Railway Company.

BTU: British Thermal Unit.

Capital Budget: Fixed assets and capital projects to be acquired or contracted during the budget period.

Capital Expenditure: Expenditures that result in the acquisition of, or addition to, fixed assets including land, buildings, improvements, machinery, and equipment.

CA: Cab to Axle.

CARES: Computer Assisted Restoration of the Electric System.

CCTV: Closed-circuit television.

C&C: Cab and Chassis.

CC&C: Crew Cab & Chassis.

CKT: Circuit.

CN: Canadian National Railway.

CNG: Compressed Natural Gas.

CO: Carryover.

CPU: Central Processing Unit.

CSX: CSX Transportation.

CSX/RR: CSX Transportation Railroad.

DA: Distribution Automation.

DASD: Direct Access Storage Device.

DB: Decibel.

DDC: Direct Digital Controller.

Debt Service: Principal and interest payments on outstanding bonds.

DIMP: Distribution Integrity Management Program.

DOT: Department of Transportation.

GLOSSARY

ERC: Emergency Response Center.

ESO: Electric Systems Operations.

Expenditure: The outflow of funds paid or to be paid for an asset obtained or goods and services obtained regardless of when the expense is actually paid.

FC: Suffix for connector type.

FCI: Failed Circuit Indicators.

FEMA: Federal Emergency Management Agency.

FIS: Facility Information System.

Fixed Assets: Assets that are used in a productive capacity, have physical substance, are relatively long-lived, and provide future benefit, which is readily measurable, such as land, buildings, machinery, furniture, vehicles, other equipment and capital projects. Those assets that are capitalized and depreciated over a period of time.

GAAP: Generally Accepted Accounting Principals. Uniform minimum standards and guidelines for disclosing, recording and reporting financial transactions and entries.

GASB: Governmental Accounting Standards Board.

GIS: Geographic Information System.

GPS: Global Positioning System.

HHSC: Hickory Hill Service Center.

HMI: Human Machine Interface.

HP: High Pressure.

HSP: High Service Pump.

HVAC: Heating, Ventilation, and Air Conditioning.

IC RR: Illinois Central Railroad.

IDS: Intrusion Detection System.

IR: Infrared.

JT: Joint Trench.

KV: Kilo Volts, a unit of potential equal to a thousand volts.

KVA: Kilo Volt-Ampere, one thousand volt-amps.

GLOSSARY

KW: Kilowatt.

LC: Suffix for connector type.

LNG: Liquefied Natural Gas.

LOL: Leased Outdoor Lighting.

LWB: Long Wheel Base pickup.

MAOP: Maximum allowable operating pressure.

MDMS: Meter Data Management System.

MG: Millions of gallons.

MGD: Million gallons per day.

MH/DL: Manhole/Ductline.

MHz: Megahertz.

MSS: Management Support System.

NERC: North American Electric Reliability Corporation.

Net Assets: The difference between assets and liabilities for a period of time.

O&M: Operations and Maintenance.

OH: Overhead.

OPEB: Other Post Employment Benefits.

Operating Budget: The portion of the budget that pertains to daily operations that provide basic services. The operating budget contains approved expenditures.

OPGW: Optical Ground Wire.

OTL: Oracle Time and Labor.

OTDR: Optical Time Domain Reflectometer.

Pad: Pad-mounted transformer.

PCB: Polychlorinated Bithenyls.

PSI: Pound per Square Inch.

PTAC: Packaged terminal air conditioning.

PTO: Power Take Off.

GLOSSARY

PV: Photo-Voltaic or solar cells.

ROW: Right of Way.

RR: Railroad.

RTU: Remote Terminal Unit.

SAN: Storage Area Network.

SC: Suffix for connector type.

SCADA: Supervisory Control and Data Acquisition, used to monitor and control the electric system. SCADA gathers information and transfers the information to a central site.

SCBPU: Shelby County Board of Public Utilities.

SPCC: Spill Prevention, Control and Countermeasure.

T-line: Transmission line.

TDOT: Tennessee Department of Transportation.

TEMA: Tennessee Emergency Management Agency.

TIMP: Transmission Integrity Management Program

TOU: Time of Use.

UG: Underground.

UPS: Uninterruptible Power Source.

URD: Underground Residential Development.

USPS: United States Postal Service.

VAV: Variable Air Volume.

VFD: Variable Frequency Drive.

WAQL: Water Assurance Quality Lab.

WWRB: Wash water Recovery Basin.

XFMR: Symbol used to denote transformer.

XHP: Extra High Pressure.

XXHP: Extra, Extra High Pressure.
